Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Client Services Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), Fax: (613) 951-2848 or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020		

You can also visit our World Wide Web site: <http://www.statcan.ca>

Toll-free access is provided for all users who reside outside the local dialling area of any of the Regional Reference Centres.

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolinguage et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section du service à la clientèle, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606), télécopieur : (613) 951-2848 ou à l'un des centres de consultation régionaux de Statistique Canada :

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020		

Vous pouvez également visiter notre site sur le W3 : <http://www.statcan.ca>

Un service d'appel interurbain sans frais est offert à tous les utilisateurs qui habitent à l'extérieur des zones de communication locale des centres de consultation régionaux.

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

Highlights

Consumer Price Behaviour

First Quarter 1996

Trends in Consumer Price Movements

The average price of the basket of goods and services making up the Consumer Price Index (CPI) rose by 0.7% between December 1995 and March 1996 (first quarter). Prices rose 0.2% in January, 0.1% in February, then 0.4% in March. In the previous quarter, a price increase in November was cancelled by declines in October and December resulting in no change in the average price of the basket over the period.

In March 1996, consumer prices were, on average, 1.4% higher than a year before. The annual rate over the first three months of 1996 was also 1.4%. This was considerably lower than the average 2.1% advance in 1995. The general decline in 12-month inflation noted since May of 1995 extended into the first quarter of 1996.

In seasonally adjusted terms, the CPI rose by 0.4% in the first quarter of 1996. Seasonally adjusted quarterly increases slowed from 0.7% in the first quarter of 1995 to 0.5% in the second, 0.3% in the third, and 0.2% in the fourth. The 0.4% increase in the first quarter of 1996 represented a break in the trend toward lower inflation.

Increases in provincial CPI's were lowest in Manitoba, Saskatchewan and British Columbia (0.5%). Manitoba and Saskatchewan had shown the largest advances in the previous quarter. The largest increase in the latest quarter was in New Brunswick (1.2%), a province which had shown one of the largest declines in the previous quarter. In Whitehorse and Yellowknife, marginal increases of 0.1% were noted in the latest quarter following declines of 0.3% in the previous quarter.

Major Components (not seasonally adjusted)

Most of the 0.7% rise in the CPI in the first quarter came from advances in the indexes for Clothing and Footwear, Transportation, Household Operations and Furnishings, and Food. Shelter was the only major component index which fell.

The Clothing and Footwear index advanced by 2.9% with significant price gains being observed for most of its components. One factor behind this large advance was an exceptional drop in prices in December. Another factor was the pass through effects of higher prices for some types of raw materials.

The advance of 0.9% in the Transportation index resulted mainly from increases in gasoline prices and automobile insurance premiums. Gasoline price ended the quarter 2.6% higher after slipping in the first two months then surging in March. An increase in demand and a decline in inventories following a long and cold winter were reasons advanced for this price increase. The largest increases in auto insurance premiums were registered in Manitoba and British Columbia.

Charges related to household operations and furnishings rose by an average 1.5% in the latest quarter. A large part of this came from an increase of \$2.00 per month in local telephone rates in most provinces. In British Columbia, telephone charges increased further as the boundaries of the local calling areas

Faits saillants

Comportement des prix à la consommation

Premier trimestre de 1996

Tendances des mouvements des prix à la consommation

Le prix moyen du panier des biens et des services qui forment l'indice des prix à la consommation (IPC) a augmenté de 0,7% entre décembre 1995 et mars 1996 (premier trimestre). La progression a été de 0,2% en janvier, de 0,1% en février, puis de 0,4% en mars. Au trimestre précédent, une augmentation de prix en novembre a été effacée par des diminutions en octobre et en décembre, si bien que le prix moyen du panier n'avait pas varié au cours de la période.

En mars 1996, les prix à la consommation étaient, en moyenne, de 1,4% plus hauts qu'un an plus tôt. Le taux annuel sur les trois premiers mois de 1996 était également de 1,4%. C'est nettement moins que l'avance moyenne de 2,1% pour 1995. La baisse générale de l'inflation sur 12 mois observée depuis mai 1995 s'est poursuivie au premier trimestre de 1996.

En chiffres désaisonnalisés, l'IPC a monté de 0,4% au premier trimestre de 1996. Les augmentations trimestrielles désaisonnalisées ont ralenti, tombant de 0,7% au premier trimestre de 1995, à 0,5% au deuxième, à 0,3% au troisième, puis à 0,2% au quatrième. Le gain de 0,4% au premier trimestre de 1996 représentait une interruption de la tendance à une diminution de l'inflation.

Les augmentations des IPC provinciaux ont été les plus faibles au Manitoba, en Saskatchewan et en Colombie-Britannique (0,5%). Le Manitoba et la Saskatchewan avaient affiché les plus fortes avances au trimestre précédent. L'augmentation la plus considérable au dernier trimestre a été au Nouveau-Brunswick (1,2%), c'est-à-dire dans une province qui avait affiché l'un des replis les plus nets au trimestre précédent. À Whitehorse et à Yellowknife, on a observé des augmentations marginales de 0,1% au dernier trimestre, après des baisses de 0,3% au trimestre précédent.

Principales composantes (non désaisonnalisées)

Le gros de l'augmentation de 0,7% de l'IPC au premier trimestre s'explique par des hausses des indices de l'habillement et les chaussures, des transports, des dépenses et de l'équipement du ménage et des aliments. Le logement est la seule grande composante qui ait connu une diminution.

L'indice de l'habillement et des chaussures a avancé de 2,9%, sous la poussée de fortes augmentations de prix de la plupart de ses composantes. Un facteur qui explique cette forte avance est la baisse exceptionnelle des prix en décembre, ce à quoi il faut ajouter les répercussions de l'augmentation des prix pour certains genres de matières brutes.

L'avance de 0,9% de l'indice des transports est essentiellement le fruit d'augmentations des prix de l'essence et des primes d'assurance automobile. À la fin du trimestre, les prix de l'essence avaient augmenté de 2,6%, après avoir glissé au cours des deux premiers mois, puis bondi en mars. L'augmentation de la demande et la diminution des stocks, après un hiver long et rigoureux, étaient au nombre des raisons expliquant cette augmentation de prix. Les plus fortes augmentations de primes d'assurance automobile ont été observées au Manitoba et en Colombie-Britannique.

Les frais liés aux dépenses et à l'équipement du ménage ont avancé en moyenne de 1,5% au dernier trimestre. Une part considérable du gain vient d'une augmentation de 2,00\$ par mois des tarifs du service téléphonique local dans la plupart des provinces. En Colombie-Britannique, les frais du service téléphonique ont augmenté encore

were expanded. Higher prices were also noted for paper supplies, horticultural goods and household tools.

The Food index rose by 0.8% in the first quarter. Prices of food purchased from grocery stores increased by 1.0% while those of restaurant meals increased by 0.5%. In grocery stores, major price increases were observed for poultry, dairy products, fresh fruit (notably bananas), fresh vegetables, and soft drinks. Poultry prices rose largely in response to higher feed costs. The price rise in dairy products and soft drinks came with the end of promotional pricing during the Christmas holiday season. The prices of many fresh vegetables rose as a result of cold weather in the southern United States. Banana prices advanced rapidly in March as floods affected the growing areas of Central America.

Other commodities also posted notable price gains in the first quarter. Among these were traveller accommodation charges and travel tour quotations. Prices for newspapers, magazines and books also increased. Beer prices were up as well.

Shelter was the only major component index to decline in the first quarter. The marginal drop of 0.1% resulted from a decline of 0.4% in owned accommodation charges offset, to a large extent, by increases of 0.2% in rented accommodation charges and 0.7% in water, fuel and electricity rates. The decline in owned accommodation charges came largely from falls in mortgage interest costs and new house prices.

Special aggregates

The Goods index advanced by 0.9% following a much smaller 0.3% rise in the previous quarter. A large part of the latest increase came from a 2.7% rise in the semi-durables index driven by sharp price advances noted in several items of clothing and footwear. Price increases for food, and gasoline helped push up the non-durables index by 0.9%. The index for durables moved up by a more moderate 0.2%.

The Services index rose by 0.5% recovering from a drop of 0.4% in the fourth quarter of 1995. The latest rise was associated largely with increases in local telephone rates, automobile insurance premiums, air fares, hotel/motel rates and travel tour quotations.

The Energy index climbed by a rapid 1.5% after posting declines in each of the two previous quarters. Most of the increase in the latest quarter was due to higher gasoline prices (2.6%). Fuel oil and electricity charges also rose by 3.7% and 0.3% respectively while piped gas rates fell by 1.3%.

The All-items excluding Food and Energy index gained momentum, rising by 0.7% in the first quarter following a drop of 0.1% in the preceding quarter.

plus, avec l'agrandissement des secteurs de service local. On a aussi observé des augmentations de prix des articles en papier, des produits horticoles et des outils de ménage.

L'indice des aliments a monté de 0,8% au premier trimestre. Les prix des aliments achetés à l'épicerie ont augmenté de 1,0%, et ceux des repas pris au restaurant de 0,5%. À l'épicerie, on a observé de fortes augmentations de prix pour la volaille, les produits laitiers, les fruits frais (surtout les bananes), les légumes frais et les boissons gazeuses. L'avance des prix de la volaille vient surtout de la hausse des coûts de l'engraissement. L'augmentation des prix des produits laitiers et des boissons gazeuses est survenue au terme d'une période de prix de promotion pour la période de Noël. Le prix de nombreux légumes frais a augmenté à cause du temps froid qui a sévi dans le Sud des États-Unis. Le prix des bananes a avancé rapidement en mars, suite aux inondations qui ont envahi les zones de croissance de l'Amérique centrale.

Il y a eu d'autres gains marqués de prix au premier trimestre. C'est le cas notamment des frais d'hébergement pour voyageurs et des prix des voyages organisés. Les prix des journaux, des revues et des livres ont aussi augmenté. Le prix de la bière a avancé également.

Le logement est la seule grande composante de l'indice à avoir diminué au premier trimestre. Le repli marginal de 0,1% est la conséquence d'une baisse de 0,4% des frais de logement en propriété, qui a été effacée, dans une large mesure, par des augmentations de 0,2% des frais de logement en location et de 0,7% des tarifs d'eau, de mazout et d'électricité. La baisse des frais de logement en propriété vient essentiellement d'une chute des coûts d'intérêt hypothécaire et des prix des maisons neuves.

Agrégats spéciaux

L'indice des biens a avancé de 0,9% après une progression beaucoup plus timide de 0,3% au trimestre précédent. Une forte part de la dernière avance est venue d'une augmentation de 2,7% de l'indice des biens semi-durables, stimulée par la montée en flèche du prix de plusieurs articles d'habillement et de chaussures. Les augmentations de prix pour les aliments et l'essence ont contribué à la montée de 0,9% de l'indice des biens non durables. L'indice des biens durables a réalisé une avance plus modérée de 0,2%.

L'indice des services a augmenté de 0,5%, après une baisse de 0,4% au quatrième trimestre de 1995. Cette dernière hausse est dans une large mesure liée aux augmentations des tarifs des services téléphoniques locaux, des primes d'assurance automobile, des tarifs aériens, des tarifs d'hôtel et de motel et des prix des voyages organisés.

L'indice de l'énergie a fait un bond de 1,5% après s'être replié dans chacun des deux trimestres précédents. Le gros de l'augmentation du dernier trimestre vient de la hausse des prix de l'essence (2,6%). Les frais de mazout et d'électricité ont aussi monté de 3,7% et 0,3%, respectivement, pendant que les tarifs de gaz fléchissaient de 1,3%.

L'indice d'ensemble sans les aliments et l'énergie a pris son élan, avec une progression de 0,7% au premier trimestre, après un recul de 0,1% au trimestre précédent.

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the importance and the nature of the commodity. The samples are

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30 000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de l'importance et de la nature de celui-ci. L'échantillon est conçu de façon

designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 Occasional or contact Prices Division.

à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un « enchaînement » des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le « mois d'enchaînement », les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

Alcoholic beverages and tobacco products	5.5	4.5	6.0	Boissons alcoolisées et produits du tabac

¹ The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

¹ Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as 76.5¢ $\{(100.0 / 130.7) * 100\}$ did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû déboursier 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait la même quantité de biens et de services que 76,5 cents $\{(100,0 / 130,7) * 100\}$ en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTER-CITY INDEXES OF RETAIL PRICE DIFFERENTIALS

Table 10 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly consumer price indexes.

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets as far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item indexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100.

The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city weighting patterns updated for price change to the time of the inter-city retail price comparison study.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Footnotes for Table 10

(2) The weights shown are rounded 1992 weights for Canada as contained in the report *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures (Occasional)*, Catalogue 62-553. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price change since 1992.

Appendice 3

INDICES COMPARATIFS DES PRIX DE DÉTAIL PAR VILLE

Le tableau 10 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie des relevés de prix utilisés pour la production de l'indice mensuel des prix à la consommation.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont d'abord été calculées séparément pour les paires de villes suivantes:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison des 11 villes étant égale à 100).

Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en appliquant le schéma de pondération des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importants pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Notes pour le tableau 10

(2) Les poids indiqués sont les poids arrondis pour 1992 pour le Canada figurant dans le **Document de référence de l'Indice des prix à la consommation, mise à jour fondée sur les dépenses de 1992** (hors-série, no. 62-553 au catalogue). Ils ne sont présentés qu'à titre documentaire; les poids utilisés en fait sont les poids des villes combinés rajustés en fonction des variations des prix observées depuis 1992.

(3) Includes the following sub-groups: sugar and syrups, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegars, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

(3) Comprend les sous-groupes suivants: sucre et sirop, confiserie, margarine, autres huiles et matières grasses comestibles, café, thé, condiments, épices et vinaigres, soupe, aliments pour bébés et enfants, préparations alimentaires précuites et congelées, boissons non-alcoolisées et toutes autres préparations alimentaires.

Appendix 4

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 4

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 15 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la révision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 15 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Principal commodity group	Number of items priced (if available)
Food at home	170
Meals away from home	12
Household maintenance and services	7
Household supplies	28

SERVICES INDICATORS

For and About Businesses Serving the Business of Canada...

At last, current data and expert analysis on this VITAL sector in one publication!

The services sector now dominates the industrial economies of the world. Telecommunications, banking, advertising, computers, real estate, engineering and insurance represent an eclectic range of services on which all other economic sectors rely.

Despite their critical economic role, however, it has been hard to find out what's happening in these industries. Extensive and time-consuming efforts have, at best, provided a collection of diverse bits and pieces of information ... an incomplete basis for informed understanding and effective action.

Now, instead of this fragmented picture, *Services Indicators* brings you a cohesive whole. An innovative quarterly from Statistics Canada, this publication **breaks new ground**, providing **timely** updates on performance and developments in:

Communications

Finance, Insurance and Real Estate

Business Services

Services Indicators brings together analytical tables, charts, graphs and commentary in a stimulating and inviting format. From a wide range of key financial indicators including profits, equity, revenues, assets and liabilities, to trends and analysis of employment, salaries and output – PLUS a probing feature article in every issue, *Services Indicators* gives you the complete picture **for the first time!**

Finally, anyone with a vested interest in the services economy can go to *Services Indicators* for **current** information on these industries ... **both at-a-glance and in more detail than has ever been available before** – all in one unique publication.

If **your** business is serving business in Canada, or if you are involved in financing, supplying, assessing or actually using these services, *Services Indicators* is a turning point – an opportunity to forge into the future armed with the most current insights and knowledge.

Order YOUR subscription to *Services Indicators* today!

Services Indicators (catalogue no. 63-0160XPB) is \$112 (plus 7% GST and applicable PST) in Canada, US\$135 in the United States and US\$157 in other countries.

To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call 1-800-267-6677 toll-free in Canada and the United States [1-613-951-7277 elsewhere] and charge to your VISA or MasterCard.

INDICATEURS DES SERVICES

Au sujet des entreprises au service des affaires du Canada et à leur intention...

Enfin regroupées en une publication, des données courantes et des analyses éclairées sur ce secteur **ESSENTIEL!**

Le secteur des services domine à l'heure actuelle les économies industrielles du monde. Les télécommunications, les opérations bancaires, la publicité, l'informatique, l'immobilier, le génie et l'assurance représentent une gamme éclectique de services sur lesquels reposent tous les autres secteurs économiques.

En dépit de leur rôle critique sur le plan économique, il est toutefois difficile de savoir ce qui se passe dans ces branches d'activité. Des efforts considérables et fastidieux ont permis, au mieux, de rassembler une collection de renseignements fragmentaires divers... qui ne favorisent pas la compréhension avisée et la prise de mesures efficaces.

Remplacez **maintenant** ce tableau fragmentaire par l'image cohérente que vous offre *Indicateurs des services*. Cette publication trimestrielle innovatrice de Statistique Canada **pénètre dans un domaine inexploré**, fournissant des aperçus **opportuns** du rendement et des progrès dans les domaines suivants :

Communications

Finance, assurance et immobilier

Services aux entreprises

Indicateurs des services rassemble des tableaux analytiques, des diagrammes, des graphiques et des observations en un mode de présentation stimulant et attrayant. En puisant à même une vaste gamme d'indicateurs financiers importants, allant notamment des profits, des capitaux propres, des recettes, de l'actif et du passif aux tendances et analyses de l'emploi, des salaires et de l'extrant – à laquelle s'ajoute un article de fond exploratif dans chaque numéro, *Indicateurs des services* brosse **pour la première fois** un tableau complet!

Enfin, quiconque s'intéresse au secteur des services peut consulter *Indicateurs des services* pour trouver des renseignements **courants** sur ces branches d'activité... tant sous une **forme sommaire qu'à un niveau de détail n'ayant jamais encore été offert** – et ce, dans une même publication.

Si vous êtes de ceux qui fournissent des services aux entreprises canadiennes, ou si vous financez, fournissez ou évaluez ces services ou y avez en fait recours, *Indicateurs des services* représente un tournant – une chance de s'aventurer dans l'avenir en étant armé des réflexions et connaissances les plus actuelles.

Commandez dès aujourd'hui VOTRE abonnement à *Indicateurs des services!*

Indicateurs des services (n° 63-0160XPB au catalogue) coûte 112 \$ (plus 7 % de TPS et la TVP en vigueur) au Canada, 135 \$ US aux États-Unis et 157 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division des Opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous préférez, vous pouvez télécopier votre commande en composant le 1-613-951-1584 ou téléphoner sans frais du Canada et des États-Unis au 1-800-267-6677 [ou d'ailleurs, au 1-613-951-7277] et porter les frais à votre compte VISA ou MasterCard.

FIND STRENGTH IN NUMBERS!

Let us show you how to take advantage of the multitude of data available from Canada's leading statistical agency.

Statistics Canada is the first-hand source of information about Canada, its economy, its institutions and its people. We collect and maintain hundreds of databases of reliable information; from patterns in family expenditures to international trade statistics; from details on Canadians' health and educational qualifications to employment and labour trends. We can produce comprehensive profiles of Canada's society and economy using the data from over 400 surveys.

Our Advisory Services team of expert consultants is here to help you discover Statistics Canada. We will work with you to define your needs, sift through our vast resources and put together an information package designed to meet those needs. Our highly trained staff:

- can analyze and interpret your customized data packages
- provide you with ongoing support through our telephone enquiry service
- offer workshops and seminars on a wide range of topics

We can even conduct surveys tailored to your specialized requirements.

In today's complex social and economic climates, accurate and up-to-date information is an essential tool for performing such detail-intensive tasks as researching, planning, teaching or analyzing. Rely on the expertise at Statistics Canada to provide you with the information and services you need, quickly, professionally and cost effectively.

Call us today and discover how to get our numbers working for you!

LES CHIFFRES FONT LA FORCE !

Découvrez comment tirer parti de la multitude de données offertes par le chef de file canadien en matière de statistiques.

Statistique Canada est la source directe des données sur le Canada, son économie, ses institutions et sa population. Nous compilons et tenons à jour des centaines de bases de données fiables, à partir des habitudes de dépense des familles aux statistiques sur le commerce international et des détails relatifs à la santé et aux niveaux d'instruction des Canadiens aux tendances de l'emploi et de la main-d'œuvre. Nous sommes en mesure de préparer des portraits descriptifs de la société et l'économie canadiennes à l'aide de données provenant de plus de 400 enquêtes.

L'équipe d'experts-conseils de nos services consultatifs est là pour vous aider à mieux connaître Statistique Canada. Nous travaillerons avec vous à définir vos besoins, à passer en revue nos vastes ressources et à rassembler des documents pouvant répondre à ces besoins. Notre personnel hautement qualifié :

- peut analyser et interpréter vos ensembles de données personnalisés
- vous offre un appui constant grâce à notre service de renseignements téléphonique
- organise des ateliers et des conférences sur une large gamme de sujets

Nous pouvons même mener des enquêtes spécifiquement conçues pour répondre à des besoins particuliers.

Dans un contexte social et économique de plus en plus complexe, des

renseignements exacts et à jour sont un outil essentiel pour mener à bien des tâches aussi précises que la recherche, la planification, l'enseignement ou l'analyse. Fiez-vous à l'expertise de Statistique Canada pour obtenir les renseignements et les services dont vous avez besoin de manière rapide, professionnelle et rentable.

Téléphonez-nous dès aujourd'hui et découvrez comment vous pouvez profiter de nos chiffres!

Canada: A Portrait

A Memorable Journey Through Canada

A book to captivate everyone, **Canada: A Portrait** is a compelling record in words and pictures of the excitement and diversity of present-day Canada. This all-new edition of Statistics Canada's proven bestseller features a striking full-colour dustjacket reproduction of *Sweetgrass*, the rich impressionistic painting by Canadian artist Frank Mayrs. Once you open its appealing cover, you will discover that **Canada: A Portrait** not only delights the eye, it stimulates the imagination. Each page is brimming with lively and intriguing facts, bringing to life the personality and charisma of Canada in a clear, easy-to-read and entertaining narrative.

From the important to the whimsical...

Canada: A Portrait presents you with the perfect opportunity to explore Canada at your leisure with just the turn of a page. Investigate the diverse regions of Canada from Mount Logan in the Yukon to the St. John River in New Brunswick. Delve into the heartbeat of Canada's society: Who are we? Where do we live? What do we believe in? See how the economy is evolving and what makes it tick. Learn about the activities enjoyed by today's Canadians, such as opera and hockey and home computers. **Canada: A Portrait** offers a complete examination of this unique country and reflects many interesting perspectives.

The Land, The People, The Society, Arts and Leisure, The Economy and Canada in the World

Six chapters provide a guided tour of both the physical and the human landscape of Canada. Each chapter is enriched with personal insights on "being Canadian," shared with you by such eminent people as Myriam Bédard, Gerhard Herzberg and Joe Schlesinger and is adorned with a gallery of imaginative pictorial images.

Share the **Canada: A Portrait** experience with your family, friends and colleagues

Its charming format, rich design, intriguing content and attractive price make this a keepsake volume, ideal both to give and to receive.

Canada: A Portrait is available for only \$39.95 in Canada (plus GST, applicable PST and shipping and handling), US \$51.95 in the United States and US \$59.95 in other countries. To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. Call toll-free: 1-800-700-1033 and use your Visa and MasterCard or fax your order to (613) 951-1584.

Un portrait du Canada

Un voyage mémorable à travers le Canada

Un portrait du Canada captivera tout le monde. C'est un recueil irrésistible, en mots et en images, de tout ce qui fait le dynamisme et la diversité du Canada d'aujourd'hui. Cette nouvelle édition de l'indiscutable best-seller de Statistique Canada offre, sur la jaquette, un magnifique paysage impressionniste, intitulé *Sweetgrass*, de l'artiste canadien Frank Mayrs. Dès la première page, vous serez fasciné par la beauté des images et du texte et vous laisserez vagabonder votre imagination. Chaque page regorge de faits vivants et intrigants donnant vie au caractère et au magnétisme du Canada dans une langue claire, simple et prenante.

De l'important au fantaisiste...

Un portrait du Canada vous permet de visiter le pays durant vos moments libres simplement en tournant les pages. Du mont Logan (Yukon) à la rivière Saint-Jean (Nouveau-Brunswick), tâtez le pouls des différentes régions du Canada. Fouillez au coeur même de la société canadienne : Qui sommes-nous? Où vivons-nous? Quelles sont nos croyances? Voyez comment l'économie évolue et pourquoi elle tourne. Découvrez les activités préférées des Canadiens d'aujourd'hui : de l'opéra au hockey jusqu'à l'ordinateur familial. **Un portrait du Canada** offre un examen complet de ce pays unique reflétant des perspectives intéressantes.

Le territoire, La population, La société, Les arts et les loisirs, L'économie et Le Canada dans le monde

Un tour guidé du paysage physique et humain du Canada vous est offert en six chapitres, chacun est parsemé d'oeuvres pleines d'imagination et est enrichi d'un message personnel sur le fait «d'être Canadien». Ces messages sont partagés par d'éminents Canadiens tels que Myriam Bédard, Gerhard Herzberg et Joe Schlesinger.

Partagez cette expérience avec votre famille, vos amis et vos collègues

Son format attrayant, son design riche, son contenu intrigant et son prix alléchant font d'**Un portrait du Canada** un cadeau idéal à donner ou à recevoir.

Un portrait du Canada est en vente à seulement 39,95 \$ au Canada (TPS, TVQ et frais de port et de manutention applicables en sus), 51,95 \$ US aux États-Unis et 59,95 \$ US dans les autres pays. Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6 ou communiquez avec le Centre de consultation régional de Statistique Canada le plus près (la liste figure dans la présente publication). Ou encore, téléphonez sans frais au 1-800-700-1033 et portez les frais à votre compte VISA ou MasterCard ou télécopiez votre commande au (613) 951-1584.

Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Information and Current Analysis Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606 fax: (613) 951-2848), Internet: shadsan@statcan.ca or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020		

You can also visit our World Wide Web site: <http://www.statcan.ca>

Toll-free access is provided for all users who reside outside the local dialling area of any of the Regional Reference Centres.

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinarlingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section de l'information et de l'analyse courante, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-9606 télécopieur: (613) 951-2848), Internet: shadsan@statcan.ca ou à l'un des centres de consultation régionaux de Statistique Canada :

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Margaret Parlor, Chief, Consumer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

**SIGNES CONVENTIONNELS**

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

Cette publication a été rédigée sous la direction de:

Louis Marc Ducharme, Directeur, Division des prix

Margaret Parlor, Chef, Section des prix à la consommation

Le papier utilisé dans la présente publication répond aux exigences minimales de l'American National Standard for Information Sciences – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Consumer Price Behaviour

Second Quarter, 1996

Trends in Consumer Price Movements

The price of the basket of goods and services making up the Consumer Price Index (CPI) rose, on average, 0.5% between March and June, 1996 (second quarter). This was slightly less than in the first quarter (December 1995 to March 1996) when the value of the CPI basket advanced by 0.7%. In the latest quarter, prices rose by 0.3% in both April and May but fell by 0.1% in June.

Consumer prices were, on average, 1.4% higher in June 1996 than in the same month of 1995. Since the beginning of the year, annual increases have varied between 1.3% and 1.6%. These rates were considerably lower than the 2.1% annual average increase noted in 1995.

In seasonally adjusted terms, the CPI moved up by 0.4% in the second quarter, the same as the first quarter. Seasonally adjusted monthly increases of 0.3% were registered both in April and May while a drop of 0.1% appeared in June.

Movements in provincial CPI's in the second quarter varied between lows of 0.1% in British Columbia and 0.3% in Alberta to a high of 1.5% in Nova Scotia. Increases which were well above average were reported in two other Atlantic provinces — Newfoundland (1.0%) and Prince Edward Island (1.0%).

Major components (not seasonally adjusted)

The 0.5% increase in the CPI in the second quarter reflected above average advances in the indexes for transportation, food and recreation.

A 1.5% rise in transportation charges was dominated by an advance of 7.2% in gasoline prices. Gasoline prices rose at progressively faster rates in March, April and May before falling in June. The price increases were associated with advances in crude oil prices which were affected by a rundown of inventories, unanticipated increases in world demand and uncertainty whether Iraq would reenter the international market.

The transportation index also responded to increases in the price of new cars, in Toronto transit fares and in charges for the maintenance and repair of automobiles. At the same time, auto insurance premiums were reduced in British Columbia and in Québec, and air fares declined.

Food prices rose, on average, by 1.2% as higher prices were observed for fresh vegetables (except tomatoes), fresh fruit, pork, processed meat and restaurant meals. Some of the effect of higher prices was offset by lower prices of beef, bakery products and soft drinks.

A large part of the 1.5% rise in the Recreation, Education and Reading index came from increased hotel/motel rates. Traveller accommodation charges rose by 8.1% in the second quarter, as Canada was the chosen destination of record numbers of non-resident visitors. The depressed rate of the Canadian dollar exchange rate was a major contributor to this trend. This major component index was also influenced, to a lesser extent, by higher prices for recreational vehicles, by fees and dues for the use of recreational facilities and by higher prices for newspapers.

Faits saillants

Comportement des prix à la consommation

Deuxième trimestre de 1996

Tendances des mouvements des prix à la consommation

Le prix du panier de biens et de services qui forment l'indice des prix à la consommation (IPC) a augmenté, en moyenne, de 0,5% entre mars et juin 1996 (deuxième trimestre). C'est un peu moins qu'au premier trimestre (décembre 1995 à mars 1996), où la valeur du panier de l'IPC a progressé de 0,7%. Dans le dernier trimestre, les prix ont monté de 0,3% en avril et en mai, mais fléchi de 0,1% en juin.

Les prix à la consommation étaient, en moyenne, de 1,4% plus hauts en juin 1996 par rapport au mois correspondant de 1995. Depuis le début de l'année, les augmentations annuelles ont varié entre 1,3% et 1,6%. Ces taux étaient nettement plus faibles que l'augmentation moyenne annuelle de 2,1% observée en 1995.

En chiffres désaisonnalisés, l'IPC a progressé de 0,4% au deuxième trimestre, soit la même chose qu'au premier trimestre. Des augmentations mensuelles désaisonnalisées de 0,3% ont été constatées en avril et en mai, alors qu'un repli de 0,1% est apparu en juin.

Les mouvements des IPC provinciaux au deuxième trimestre ont oscillé entre des creux de 0,1% en Colombie-Britannique et de 0,3% en Alberta et un sommet de 1,5% en Nouvelle-Écosse. Il y a eu des augmentations bien supérieures à la moyenne dans deux autres provinces de l'Atlantique : Terre-Neuve (1,0%) et Île-du-Prince-Édouard (1,0%).

Principales composantes (avant désaisonnalisation)

La hausse de 0,5% de l'IPC au deuxième trimestre est le reflet d'avances supérieures à la moyenne des indices des transports, des aliments et des loisirs.

Une augmentation de 1,5% des frais de transport a été dominée par une avance de 7,2% des prix de l'essence. Les prix de l'essence ont accéléré graduellement en mars, en avril et en mai, avant de chuter en juin. Les augmentations de prix étaient liées aux avances des prix du pétrole brut, sous l'effet d'un épuisement des stocks, d'augmentations imprévues de la demande mondiale et de l'incertitude quant au retour éventuel de l'Iraq sur le marché international.

L'indice des transports a aussi réagi aux augmentations des prix des voitures neuves, des tarifs du transport urbain à Toronto, et des frais pour l'entretien et les réparations des automobiles. En même temps, les primes d'assurance automobile ont diminué en Colombie-Britannique et au Québec, et les tarifs aériens ont fléchi.

Les prix des aliments ont monté, en moyenne, de 1,2% à la faveur d'une hausse des prix des légumes frais (sauf les tomates), des fruits frais, du porc, des viandes traitées et des repas pris au restaurant. L'effet de l'accroissement des prix a été partiellement compensé par la diminution des prix du bœuf, des produits de boulangerie et des boissons gazeuses.

Une part importante de la progression de 1,5% de l'indice des loisirs, de la formation et de la lecture est imputable aux tarifs d'hôtel et de motel. Les frais d'hébergement pour voyageurs ont monté de 8,1% au deuxième trimestre, car le Canada a été la destination de choix d'un nombre record de visiteurs non résidents. La faiblesse du taux de change du dollar canadien était un facteur déterminant de cette tendance. L'indice de cette composante principale a aussi subi l'influence, quoique dans une mesure moindre, de l'augmentation des prix des véhicules de loisirs, de la hausse des frais et cotisations pour l'utilisation d'installations de loisirs et de l'augmentation des prix des journaux.

Less conspicuous increases were registered by three other major component indexes. The Alcoholic Beverages and Tobacco Products index increased by 0.8% largely due to higher prices for cigarettes and wine purchased from stores. Higher prices for furniture and chemical products, only partially offset by price declines for paper supplies, household textiles and horticultural goods, pushed up the Household Operations and Furnishings index by 0.4%. Health and Personal Care charges increased by 0.4%, with higher charges for dental care and non-prescribed medicines offset, to some extent, by a drop in the price of some personal care items.

The overall upward pressure on the CPI in the second quarter was moderated, to some extent, by lower prices for clothing and footwear and for shelter.

Prices of nearly all types of clothing and footwear declined in the second quarter. Data on retail trade to June 1996 have indicated considerable declines in the sales of stores selling women's clothing, men's clothing and footwear between January and May this year compared to the same period last year.

Most of the 0.1% decline in the Shelter index came from lower charges for mortgage interest, new houses and piped gas. The last was influenced by a build up of inventories. A large part of the combined impact of these declines was offset by increases in residential rents, homeowners' maintenance and repair charges, and electricity rates.

Special aggregates

The Goods index moved up by 0.8% in the second quarter, almost the same as the 0.9% rise in the first quarter. A large part of the latest increase resulted from an advance of 1.6% in the prices of non-durables followed by a rise of 0.5% in the prices of durables. These increases were moderated by a decline of 1.7% in the prices of semi-durables caused mostly by the drop in clothing and footwear prices.

The Services index edged up by 0.3% following a rise of 0.5% in the first quarter. The latest rise was associated with price increases for restaurant meals, traveller accommodation, city bus and subway transportation, the use of recreational facilities, dental care and rented accommodation. An offset resulted from lower auto insurance premiums and owned accommodation charges.

The Energy index advanced by 3.0% in the second quarter following a rise of 1.5% in the first quarter. Most of the advance in the first quarter was attributable to the large rise in gasoline prices (7.2%). Smaller increases were noted in electricity rates (0.9%) and fuel oil prices (1.4%). At the same time piped gas rates fell by a large 7.4%.

The All-items excluding Food and Energy index rose by a marginal 0.1% in the second quarter following a much steeper increase of 0.7% in the first quarter.

Les indices de trois autres composantes principales ont accusé des augmentations moins évidentes. L'indice des boissons alcoolisées et des produits du tabac a avancé de 0,8%, à cause surtout de l'augmentation des prix des cigarettes et du vin acheté au magasin. La hausse des prix des meubles et des produits chimiques, qui n'a été que partiellement effacée par des baisses de prix des articles en papier, des articles ménagers en matière textile et des produits horticoles, a fait avancer de 0,4% l'indice des dépenses et de l'équipement du ménage. Les frais de santé et de soins personnels ont augmenté de 0,4%, la progression des frais pour soins dentaires et médicaments non prescrits ayant jusqu'à un certain point été effacé par la baisse du prix de certains articles de soins personnels.

Les pressions globales visant à faire augmenter l'IPC au deuxième trimestre ont été modérées, dans une certaine mesure, par la baisse des prix de l'habillement et des chaussures ainsi que du logement.

Les prix de presque tous les genres de vêtements et de chaussures se sont repliés au deuxième trimestre. Les données sur le commerce de détail jusqu'en juin 1996 révélaient des reculs considérables des ventes des magasins vendant des vêtements pour femmes, des vêtements pour hommes et des chaussures, entre janvier et mai de cette année, par rapport à la même période de l'an dernier.

Le plus clair du repli de 0,1% de l'indice du logement est venu de la diminution des frais d'intérêt hypothécaire, des prix des maisons neuves et des tarifs du gaz. Les tarifs du gaz ont subi l'influence d'une accumulation de stocks. Une forte part de l'effet combiné de ces reculs a été compensée par des augmentations des loyers de résidence, des frais d'entretien et de réparations par le propriétaire, et des tarifs d'électricité.

Agrégats spéciaux

L'indice des biens a augmenté de 0,8% au deuxième trimestre, ce qui est presque identique à la progression de 0,9% du premier trimestre. Une bonne part de la dernière augmentation est le résultat d'une avance de 1,6% des prix des biens non durables, suivie d'une hausse de 0,5% des prix des biens durables. Ces augmentations ont été modérées par une diminution de 1,7% des prix des biens semi-durables, provoquée essentiellement par la chute des prix de l'habillement et des chaussures.

L'indice des services a avancé de 0,3%, après avoir monté de 0,5% au premier trimestre. La dernière augmentation était liée aux augmentations de prix des repas pris au restaurant, de l'hébergement pour voyageurs, du transport urbain en autobus et métro, de l'utilisation des installations de loisirs, des soins dentaires et du logement en location. Il y a eu compensation par la diminution des primes d'assurance automobile et des frais de logement en propriété.

L'indice de l'énergie a avancé de 3,0% au deuxième trimestre, après avoir gagné 1,5% au premier trimestre. Le plus clair de l'avance du premier trimestre est attribuable à la forte augmentation des prix de l'essence (7,2%). Des augmentations plus modestes des tarifs d'électricité (0,9%) et des prix du mazout (1,4%) ont été observées. En même temps, les tarifs du gaz ont subi une chute importante de 7,4%.

L'indice d'ensemble, sans les aliments et l'énergie, a connu une légère progression de 0,1% au deuxième trimestre, après une augmentation beaucoup plus marquée de 0,7% au premier trimestre.

10	Bacon	500 g	3.12	3.22	3.47
11	Wieners – Saucisses fumées	450 g	2.45	2.38	2.34
12	Canned sockeye salmon – Saumon sockeye, en conserve	213 g	3.59	3.62	3.63
13	Homogenized milk – Lait homogénéisé	1 l	1.34	1.34	1.34
14	Partly skimmed milk – Lait partiellement écrémé	1 l	1.29	1.30	1.30
15	Butter – Beurre	454 g	2.86	2.84	2.84
16	Processed cheese food slices – Préparation de fromage fondu, en tranches	250 g	2.65	2.64	2.60
17	Evaporated milk – Lait évaporé	385 ml	1.02	1.03	1.04
18	Eggs – Oeufs	1 dz	1.66	1.67	1.69
19	Bread – Pain	675 g	1.29	1.29	1.30
20	Soda crackers – Biscuits soda	450 g	2.03	2.04	2.02
21	Macaroni	500 g	1.01	1.03	1.03
22	Flour – Farine	2.5 kg	3.47	3.48	3.62
23	Corn flakes – Flocons de maïs	675 g	2.98	2.98	2.91
24	Apples – Pommes	1 kg	2.24	2.28	2.35
25	Bananas – Bananes	1 kg	1.34	1.34	1.27
26	Grapefruits – Pamplemousses	1 kg	1.42	1.47	1.82
27	Oranges	1 kg	1.77	1.79	1.90
28	Apple juice, canned – Jus de pommes, en conserve	1.36 l	1.69	1.71	1.74
29	Orange juice, tetra-brick – Jus d'orange, tetra-brick	1 l	1.61	1.66	1.62
30	Cabbage – Choux	1 kg	1.01	1.15	1.32
31	Carrots – Carottes	1 kg	1.32	1.41	1.39
32	Celery – Céleri	1 kg	1.45	1.43	1.48
33	Mushrooms – Champignons	1 kg	5.83	5.46	5.62
34	Onions – Oignons	1 kg	0.88	0.88	0.96
35	Potatoes – Pommes de terre	4.54 kg	2.57	2.79	3.46
36	French fried potatoes, frozen – Pommes de terre frites, congelées	1 kg	1.71	1.72	1.67
37	Baked beans, canned – Fèves au lard en conserve	398 ml	0.79	0.77	0.80
38	Tomatoes, canned – Tomates, en conserve	796 ml	1.21	1.20	1.20
39	Tomato juice, canned – Jus de tomate en conserve	1.36 l	1.44	1.45	1.47
40	Ketchup	1 l	2.31	2.25	2.26
41	Sugar, white – Sucre blanc	2 kg	2.05	2.06	2.07
42	Coffee, roasted – Café torréfié	300 g	3.45	3.45	3.45
43	Coffee, instant – Café instantané	200 g	6.32	6.31	6.07
44	Tea (bags) – Thé (sachets)	72	2.75	2.86	2.88
45	Cooking or salad oil – Huile à frire ou à salade	1 l	3.11	3.15	3.07
46	Soup, canned – Soupe, en conserve	284 ml	0.74	0.73	0.75
47	Baby food – Nourriture pour bébés	128 ml	0.52	0.53	0.53
48	Peanut butter – Beurre d'arachide	500 g	2.62	2.60	2.58
49	Fruit flavoured crystals – Cristaux à saveur de fruit	2.25 l	1.31	1.32	1.30
50	Soft drinks, cola type – Boissons gazeuses, cola	2 l	1.33	1.34	1.30
51	Soft drinks, lemon type – Boissons gazeuses, citron-lime	2 l	1.46	1.48	1.44
52	Laundry detergent – Détergent synthétique, en poudre	4 l	6.06	6.04	6.03
53	Paper towels (rolls) – Essuie-tout en papier (rouleaux)	2	1.76	1.73	1.70
54	Facial tissue – Papier-mouchoirs	200	1.53	1.51	1.48
55	Bathroom tissue (rolls) – Papier hygiénique (rouleaux)	4	1.91	1.89	1.85
56	Shampoo – Shampoing	300 ml	2.98	3.01	3.00
57	Deodorant – Désodorisant	60 g	2.80	2.76	2.76
58	Tooth paste – Pâte dentifrice	100 ml	1.26	1.31	1.30
59	Cigarettes	200	31.22	31.55	31.59

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30,000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de

importance and the nature of the commodity. The samples are designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 (Occasional) or contact Prices Division.

l'importance et de la nature de celui-ci. L'échantillon est conçu de façon à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un « enchaînement » des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le « mois d'enchaînement », les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

Alcoholic beverages and tobacco products	5.5	4.5	6.0	Boissons alcoolisées et produits du tabac	

¹ The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

¹ Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992.

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as 76.5¢ $\left(\frac{100.0}{130.7} \times 100\text{¢}\right)$ did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû déboursier 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait la même quantité de biens et de services que 76,5 cents $\left(\frac{100,0}{130,7} \times 100 \text{ cents}\right)$ en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTER-CITY INDEXES OF RETAIL PRICE DIFFERENTIALS

Table 10 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly consumer price indexes.

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets as far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item indexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100.

The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city weighting patterns updated for price change to the time of the inter-city retail price comparison study.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Footnotes for Table 10

(2) The weights shown are rounded 1992 weights for Canada as contained in the report **The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures (Occasional)**, Catalogue 62-553. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price change since 1992.

Appendice 3

INDICES COMPARATIFS DES PRIX DE DÉTAIL PAR VILLE

Le tableau 10 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie des relevés de prix utilisés pour la production de l'indice mensuel des prix à la consommation.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont d'abord été calculées séparément pour les paires de villes suivantes:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison des 11 villes étant égale à 100).

Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en appliquant le schéma de pondération des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importants pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Notes pour le tableau 10

(2) Les poids indiqués sont les poids arrondis pour 1992 pour le Canada figurant dans le **Document de référence de l'Indice des prix à la consommation, mise à jour fondée sur les dépenses de 1992** (hors-série, no. 62-553 au catalogue). Ils ne sont présentés qu'à titre documentaire; les poids utilisés en fait sont les poids des villes combinés rajustés en fonction des variations des prix observées depuis 1992.

(3) Includes the following sub-groups: sugar and syrups, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegars, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

(3) Comprend les sous-groupes suivants: sucre et sirop, confiserie, margarine, autres huiles et matières grasses comestibles, café, thé, condiments, épices et vinaigres, soupe, aliments pour bébés et enfants, préparations alimentaires précuites et congelées, boissons non-alcoolisées et toutes autres préparations alimentaires.

Appendix 4

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 4

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions disparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 15 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la révision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 15 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Don't let this happen to you!

Ne vous laissez pas dépasser par les événements!

Imagine you're called upon to make a really important business decision. You spend some anxious days weighing your options. You examine the available data. Finally, you make your decision...

...only to discover too late that your information was incomplete or outdated!

If you've ever experienced this type of frustration... or if your reputation ever depends on the quality of the data you refer to... **Infomat** is for you.

Infomat is your fastest and easiest way to keep on top of important Canadian economic and social trends. Since it comes to you weekly – not daily – issues won't pile up unread. And, in just one publication, you'll have the answers to almost anything:

- ✓ price indexes
- ✓ manufacturing shipments and orders
- ✓ imports and exports
- ✓ labour market conditions, and
- ✓ dozens of key social and economic indicators!

And because **Infomat** is based on over 100 ongoing Statistics Canada surveys, no other source is more timely or more reliable.

Infomat is specially designed and written for you – a busy manager with no time to waste!

Join the confident, successful decision-makers in the country and subscribe to Infomat today!

Infomat (catalogue no. 11-0020XPE) is only \$140* per year in Canada, US\$168 in the U.S. and US\$196 in other countries. Also available by Fax Service: 50 issues for \$600* in Canada, US\$600 in the U.S. and US\$600 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613) 951-1584 and use your VISA or MasterCard.

OR MAIL your order to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. Via Internet: order@statcan.ca *plus GST and applicable PST

Imaginez que vous devez prendre une décision de gestion très importante. Vous vous faites du mauvais sang pendant quelques jours à évaluer vos options. Vous examinez les données disponibles. Vous vous décidez enfin...

... pour vous rendre compte trop tard que vous vous êtes fondé sur de l'information incomplète ou périmée!

Si vous avez déjà vécu ce genre de situation... ou si vous devez un jour miser votre réputation sur la qualité des données que vous avancez...

Infomat est pour vous.

Infomat est la façon la plus rapide et la plus facile de se tenir au courant des tendances économiques et sociales importantes au Canada. Comme il s'agit d'un hebdomadaire – non d'un quotidien – vous aurez le temps de le lire. Et dans une seule et même publication, vous trouverez réponse à presque tout :

- ✓ indices de prix
- ✓ livraisons et commandes des fabricants
- ✓ importations et exportations
- ✓ situation du marché du travail, et des
- ✓ dizaines d'indicateurs socio-économiques clés!

Et comme **Infomat** est fondé sur plus de 100 enquêtes permanentes de Statistique Canada, aucune autre source n'est plus à jour ou plus fiable.

Infomat est conçu et rédigé pour des gens comme vous – des gestionnaires qui n'ont pas de temps à perdre!

Faites comme bien d'autres décideurs au pays qui ont réussi et abonnez-vous à Infomat aujourd'hui même!

Infomat (n° 11-0020XPF au catalogue) ne coûte que 140 \$* par année au Canada, 168 \$ US aux États-Unis et 196 \$ US dans les autres pays. Nous vous offrons également le service de télécopie : 50 numéros pour 600 \$* au Canada, 600 \$ US aux États-Unis et 600 \$ US dans les autres pays.

Vous pouvez nous joindre PAR TÉLÉPHONE AU 1-800-267-6677 ou PAR TÉLÉCOPIEUR au (613) 951-1584 et utiliser votre carte VISA ou MasterCard. Ou envoyez votre commande PAR LA POSTE à : Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario), K1A 0T6. Vous pouvez aussi communiquer avec le Centre de consultation de Statistique Canada le plus près. La liste de ces centres se retrouve dans la présente publication. Via l'Internet: order@statcan.ca *plus la TPS et la TVP en vigueur

Canada: A Portrait

A Memorable Journey Through Canada

A book to captivate everyone, **Canada: A Portrait** is a compelling record in words and pictures of the excitement and diversity of present-day Canada. This all-new edition of Statistics Canada's proven bestseller features a striking full-colour dustjacket reproduction of *Sweetgrass*, the rich impressionistic painting by Canadian artist Frank Mayrs. Once you open its appealing cover, you will discover that **Canada: A Portrait** not only delights the eye, it stimulates the imagination. Each page is brimming with lively and intriguing facts, bringing to life the personality and charisma of Canada in a clear, easy-to-read and entertaining narrative.

From the important to the whimsical...

Canada: A Portrait presents you with the perfect opportunity to explore Canada at your leisure with just the turn of a page. Investigate the diverse regions of Canada from Mount Logan in the Yukon to the St. John River in New Brunswick. Delve into the heartbeat of Canada's society: Who are we? Where do we live? What do we believe in? See how the economy is evolving and what makes it tick. Learn about the activities enjoyed by today's Canadians, such as opera and hockey and home computers. **Canada: A Portrait** offers a complete examination of this unique country and reflects many interesting perspectives.

The Land, The People, The Society, Arts and Leisure, The Economy and Canada in the World

Six chapters provide a guided tour of both the physical and the human landscape of Canada. Each chapter is enriched with personal insights on "being Canadian," shared with you by such eminent people as Myriam Bédard, Gerhard Herzberg and Joe Schlesinger and is adorned with a gallery of imaginative pictorial images.

Share the **Canada: A Portrait** experience with your family, friends and colleagues

Its charming format, rich design, intriguing content and attractive price make this a keepsake volume, ideal both to give and to receive.

Canada: A Portrait is available for only \$39.95 in Canada (plus GST, applicable PST and shipping and handling), US \$51.95 in the United States and US \$59.95 in other countries. To order, write to Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. Call toll-free: 1-800-700-1033 and use your Visa and MasterCard or fax your order to (613) 951-1584.

Un portrait du Canada

Un voyage mémorable à travers le Canada

Un portrait du Canada captivera tout le monde. C'est un recueil irrésistible, en mots et en images, de tout ce qui fait le dynamisme et la diversité du Canada d'aujourd'hui. Cette nouvelle édition de l'indiscutable best-seller de Statistique Canada offre, sur la jaquette, un magnifique paysage impressionniste, intitulé *Sweetgrass*, de l'artiste canadien Frank Mayrs. Dès la première page, vous serez fasciné par la beauté des images et du texte et vous laisserez vagabonder votre imagination. Chaque page regorge de faits vivants et intrigants donnant vie au caractère et au magnétisme du Canada dans une langue claire, simple et prenante.

De l'important au fantaisiste...

Un portrait du Canada vous permet de visiter le pays durant vos moments libres simplement en tournant les pages. Du mont Logan (Yukon) à la rivière Saint-Jean (Nouveau-Brunswick), tâtez le pouls des différentes régions du Canada. Fouillez au coeur même de la société canadienne : Qui sommes-nous? Où vivons-nous? Quelles sont nos croyances? Voyez comment l'économie évolue et pourquoi elle tourne. Découvrez les activités préférées des Canadiens d'aujourd'hui : de l'opéra au hockey jusqu'à l'ordinateur familial. **Un portrait du Canada** offre un examen complet de ce pays unique reflétant des perspectives intéressantes.

Le territoire, La population, La société, Les arts et les loisirs, L'économie et Le Canada dans le monde

Un tour guidé du paysage physique et humain du Canada vous est offert en six chapitres, chacun est parsemé d'oeuvres pleines d'imagination et est enrichi d'un message personnel sur le fait «d'être Canadien». Ces messages sont partagés par d'éminents Canadiens tels que Myriam Bédard, Gerhard Herzberg et Joe Schlesinger.

Partagez cette expérience avec votre famille, vos amis et vos collègues

Son format attrayant, son design riche, son contenu intrigant et son prix alléchant font d'**Un portrait du Canada** un cadeau idéal à donner ou à recevoir.

Un portrait du Canada est en vente à seulement 39,95 \$ au Canada (TPS, TVQ et frais de port et de manutention applicables en sus), 51,95 \$ US aux États-Unis et 59,95 \$ US dans les autres pays. Pour commander, écrivez à Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6 ou communiquez avec le Centre de consultation régional de Statistique Canada le plus près (la liste figure dans la présente publication). Ou encore, téléphonez sans frais au 1-800-700-1033 et portez les frais à votre compte VISA ou MasterCard ou télécopiez votre commande au (613) 951-1584.

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 (plus GST and applicable PST) annually in Canada, US\$260 in the United States and US\$310 in other countries.

Highlights of the *Canadian Composite Leading Indicator* (catalogue no. 11F0008XFE) are available by fax – the same day of release – for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Via Internet: order@statcan.ca

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique** annuel à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ (plus la TPS et la TVP en vigueur) au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'*Indicateur composite avancé* (n° 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division des Opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard. Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Information and Current Analysis Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), fax: (613) 951-2848), Internet: shadsan@statcan.ca or to the Statistics Canada Regional Reference Centre in:

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolinguage et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Margaret Parlor, Chief, Consumer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

**SIGNES CONVENTIONNELS**

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

Highlights

Consumer price index

Third Quarter 1996

The average cost of the goods and services contained in the Consumer Price Index (CPI) basket rose 0.2% between June and September 1996 (third quarter). The latest quarterly rise was noticeably lower than the advances of 0.7% and 0.5% posted in the first and second quarters respectively. In monthly terms, the CPI showed no change in July and increased 0.1% in both August and September.

Consumer prices rose by 1.2% between July 1995 and July 1996, 1.4% between August 1995 and August 1996, and 1.5% between September 1995 and September 1996. Since January of this year, annual increases fluctuated between 1.2% and 1.6%.

In seasonally adjusted terms, the CPI moved up 0.4% in the third quarter. This was the same as the changes noted in the first and second quarters. In monthly terms, most of the seasonally adjusted increase was concentrated in August (0.3%). The seasonally adjusted index showed a 0.1% decline in July and a 0.1% rise in September.

The largest increases in provincial CPI's were in Alberta (1.0%), in Manitoba (0.6%) and in Saskatchewan (0.6%). Overall declines of 0.1% were seen in both Prince Edward Island and Quebec. Below average movements were also registered in British Columbia (0.0%) and Nova Scotia (0.1%).

Major components (not seasonally adjusted)

The relatively small rise in the CPI in the third quarter resulted from some large opposing price movements. Upward pressures came from Recreation, Education and Reading and from Clothing and Footwear. Most of the downward pressure came from the Food and Transportation components.

A large part of the 2.7% rise in the Recreation, Education and Reading index originated from a 11.8% advance in university tuition fees. Fees at universities in Québec and British Columbia stayed the same as last year, while fees at Ontario universities jumped 20%. *When looking at the provincial tuition fee indexes, please note that they take into account fee changes in other provinces because residents of one province may attend university in another province. For example, the index for tuition fees for Québec showed a small increase because some Québec students attend institutions in other provinces.* One reason for the overall tuition fee increase is that governments have been picking up a smaller proportion of university funding in recent years.

The Recreation, Education and Reading index was also heavily influenced by an average 15.3% advance in traveller accommodation charges in the third quarter. Charges leaped 22.1% in July as summer rates came into full force, then fell somewhat in September as autumn rates were introduced in some facilities. The July increase was the largest in several decades. Increased tourism from outside Canada, due in part to the favourable exchange rate, was a factor in the increase.

The Clothing and Footwear index climbed by 2.2% in the third quarter after declining by 2.5% in the second quarter. In the latest quarter, prices of women's and men's clothing rose, but

Faits saillants

Indice des prix à la consommation

Troisième trimestre de 1996

Le coût moyen des biens et services composant le panier de l'indice des prix à la consommation (IPC) a augmenté de 0,2% entre juin et septembre 1996 (troisième trimestre). La dernière hausse trimestrielle a été nettement plus faible que les progressions de 0,7% et 0,5% affichées aux premier et deuxième trimestres respectivement. Sur une base mensuelle, l'IPC n'a pas bougé en juillet, mais a enregistré un gain de 0,1% pour chacun des mois d'août et septembre.

Les prix à la consommation ont monté de 1,2% entre juillet 1995 et juillet 1996, de 1,4% entre août 1995 et août 1996 et de 1,5% entre septembre 1995 et septembre 1996. Depuis janvier cette année, les augmentations annuelles ont fluctué entre 1,2% et 1,6%.

En chiffres désaisonnalisés, l'IPC a progressé de 0,4% au troisième trimestre, soit la même chose qu'au premier et au deuxième trimestre. La plus grande partie de l'augmentation mensuelle désaisonnalisée est survenue en août (0,3%). L'indice désaisonnalisé a affiché un repli de 0,1% en juillet et une montée de 0,1% en septembre.

C'est en Alberta (1,0%), au Manitoba (0,6%) et en Saskatchewan (0,6%) qu'on a observé les plus fortes augmentations des IPC provinciaux. Des baisses générales de 0,1% ont été enregistrées à la fois à l'Île-du-Prince-Édouard et au Québec. Il y a aussi eu des mouvements inférieurs à la moyenne en Colombie-Britannique (0,0%) et en Nouvelle-Écosse (0,1%).

Principales composantes (avant désaisonnalisation)

L'augmentation relativement faible de l'IPC au troisième trimestre est attribuable à d'importants mouvements de prix opposés. Les prix des loisirs, de la formation et de la lecture de même que ceux de l'habillement et des chaussures ont eu un effet d'entraînement à la hausse. En revanche, les composantes des aliments et des transports ont contribué le plus à faire baisser les taux.

La hausse de 2,7% de l'indice du prix des loisirs, de la formation et de la lecture s'explique en grande partie par une progression de 11,8% des frais de scolarité à l'université. Au Québec et en Colombie-Britannique, les frais dans les universités n'ont pas bougé par rapport à l'an dernier, tandis qu'en Ontario, ils ont fait un bond de 20%. *Lorsqu'on examine les indices provinciaux des frais de scolarité, il faut savoir qu'ils tiennent compte des modifications de frais survenues dans d'autres provinces, étant donné que les résidents d'une province peuvent fréquenter une université dans une autre province. Par exemple, l'indice des frais de scolarité pour le Québec affiche une faible augmentation puisque certains étudiants du Québec fréquentent des institutions d'autres provinces.* L'augmentation générale des frais de scolarité est notamment attribuable au fait que les administrations publiques financent depuis quelques années un pourcentage moins élevé du coût de l'enseignement universitaire.

La hausse moyenne de 15,3% des frais d'hébergement des voyageurs au troisième trimestre a aussi fortement influencé l'indice du prix des loisirs, de la formation et de la lecture. En effet, les frais ont grimpé de 22,1% en juillet lors de l'entrée en vigueur des tarifs estivaux, puis se sont repliés en septembre au moment où certains établissements ont commencé à appliquer les tarifs d'automne. L'augmentation de juillet, qui est la plus notable depuis plusieurs décennies, s'explique entre autres par un accroissement du tourisme provenant de l'extérieur du Canada, attribuable en partie à un taux de change favorable, notamment.

L'indice de l'habillement et des chaussures a grimpé de 2,2% au troisième trimestre après avoir connu une diminution de 2,5% au deuxième trimestre. Au dernier trimestre, le prix des vêtements pour femmes et

children's clothing showed a decrease. Some part of the increases were due to the rising cost of raw materials such as cotton and polyester. A 1.4% rise in footwear prices more than offset a decline of 1.2% in the second quarter.

Some other price increases were also observed in the third quarter. Among them were increases for rental accommodation, reading materials, telephone services, child care and domestic services, pet food and supplies, household textiles, piped gas, alcoholic beverages from stores and personal care supplies.

A 0.9% drop in the Food index was mainly due to largely seasonal price declines for fresh vegetables and fresh fruit. Pork and beef and prices also declined. Higher prices were reported for processed meat, chicken, bakery products and dairy products. The price of restaurant meals also rose.

Transportation charges fell by 0.6% with most of this coming from a drop of 3.8% in gasoline prices. After advancing sharply in the spring, retail prices of gasoline fell 5.3% in July. Small price gains were then noted in August and September. The volatility in recent months has been associated largely with the instability in the international market for crude oil, partly a result of the unsettled conditions in Iraq. While gasoline prices went down, automobile rental charges, vehicle insurance premiums and air fares all increased.

Price declines in the third quarter were also observed for mortgage interest costs, paper supplies and cigarettes.

Special aggregates

The Goods index fell by 0.4% in the third quarter following a rise of 0.8% in the second quarter. The latest decline resulted from price decreases for non-durables (-1.0%) and, to a lesser extent, durables (-0.3%). The decline in the price of non-durables originated largely in the food and gasoline components. The Goods index was prevented from falling further as the prices of semi-durables rose 1.9%, due mainly to higher prices for clothing and footwear.

In contrast to the decline in the Goods index, the Services index jumped by 0.8%. Much of this was due to relatively large increases observed in university tuition fees, traveller accommodation charges, rental accommodation charges and in the prices of several service components of the transportation index. Some downward pull came from the continuing decline in mortgage interest costs.

The Energy index fell by 1.7% in the third quarter following a rise of 3.0% in the second quarter. The latest performance was due to a drop of 3.8% in gasoline prices. The index was prevented from declining further by increases of 0.1%, 1.0% and 0.3% in the prices of electricity, piped gas and fuel oil respectively.

The index for All-items excluding Food and Energy moved up by 0.7%, a noticeable advance from the modest 0.1% rise in the previous quarter. The Food and Energy index declined 1.2% in the third quarter after advancing 1.8% in the second quarter.

pour hommes a augmenté, alors que celui des vêtements pour enfants reculait. Une partie de l'augmentation provient de la hausse du prix des matières premières, comme le coton et le polyester. La majoration de 1,4% du prix des chaussures a plus que neutralisé la diminution de 1,2% survenue au deuxième trimestre.

On a aussi observé d'autres augmentations de prix au troisième trimestre, notamment au titre des logements en location, du matériel de lecture, des services téléphoniques, des soins pour enfants, des services ménagers, des aliments et articles pour animaux domestiques, des articles ménagers en matière textile, du gaz canalisé, des boissons alcoolisées achetées au magasin et des articles de soins personnels.

La baisse de 0,9% de l'indice des aliments s'explique principalement par le recul saisonnier du prix des fruits et légumes frais. Il y a aussi eu diminution du prix du porc et du boeuf. On a relevé une hausse du prix des viandes traitées, du poulet, des produits de boulangerie et des produits laitiers. Le prix des repas au restaurant a aussi augmenté.

Les frais de transport ont régressé de 0,6% surtout à la faveur d'une diminution de 3,8% du prix de l'essence. Après avoir affiché une nette hausse au printemps, le prix au détail de l'essence a chuté de 5,3% en juillet. On a par la suite observé de faibles montées de prix en août et septembre. La volatilité des derniers mois a été largement rattachée à l'instabilité du pétrole brut sur le marché international, facteur lui-même imputable en partie à la situation incertaine en Iraq. Pendant que le prix de l'essence chutait, les frais de location d'automobile, les primes d'assurance des véhicules et le prix des billets d'avion ont tous augmenté.

On a aussi observé au troisième trimestre une baisse du coût d'intérêt hypothécaire et du prix des articles en papier et des cigarettes.

Agrégats spéciaux

L'indice des biens a chuté de 0,4% au troisième trimestre après avoir monté de 0,8% au deuxième trimestre. Cette récente diminution est le résultat d'un recul du prix des biens non durables (-1,0%) et, dans une moins large mesure, de celui des biens durables (-0,3%). Ce sont surtout les aliments et l'essence qui sont à l'origine de la diminution du prix des biens non durables. L'augmentation de 1,9% du prix des biens semi-durables, sous l'effet principalement d'une hausse du prix de l'habillement et des chaussures, a freiné la diminution de l'indice des biens.

Par contraste à la chute de l'indice des biens, l'indice des services a grimpé de 0,8% surtout à cause des fortes augmentations observées dans les frais de scolarité à l'université, les frais d'hébergement des voyageurs, les frais des logements en location et le prix de plusieurs composantes de services de l'indice des transports. La chute continue du coût d'intérêt hypothécaire a contribué à l'effet d'entraînement vers le bas.

L'indice de l'énergie a régressé de 1,7% au troisième trimestre après être monté de 3,0% au deuxième trimestre. Cette situation s'explique par une baisse de 3,8% du prix de l'essence. Ce sont les augmentations de 0,1%, de 1,0% et de 0,3% du prix de l'électricité, du gaz canalisé et du mazout, respectivement, qui ont empêché l'indice de diminuer encore plus.

L'indice d'ensemble sans les aliments et l'énergie est monté de 0,7%, ce qui constitue une avance notable par rapport à la modeste augmentation de 0,1% survenue au trimestre précédent. L'indice des aliments et de l'énergie a chuté de 1,2% au troisième trimestre après avoir connu une hausse de 1,8% au deuxième trimestre.

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30,000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de

importance and the nature of the commodity. The samples are designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 (Occasional) or contact Prices Division.

l'importance et de la nature de celui-ci. L'échantillon est conçu de façon à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un « enchaînement » des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le « mois d'enchaînement », les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

Alcoholic beverages and tobacco products	5.5	4.5	6.0	Boissons alcoolisées et produits du tabac

¹ The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

¹ Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992.

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as 76.5¢ $\{(100.0 / 130.7) * 100\}$ did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû déboursier 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait la même quantité de biens et de services que 76,5 cents $\{(100,0 / 130,7) * 100\}$ en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTER-CITY INDEXES OF RETAIL PRICE DIFFERENTIALS

Table 10 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly consumer price indexes.

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets as far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item indexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100.

The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city weighting patterns updated for price change to the time of the inter-city retail price comparison study.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Footnotes for Table 10

(2) The weights shown are rounded 1992 weights for Canada as contained in the report **The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures (Occasional)**, Catalogue 62-553. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price change since 1992.

Appendice 3

INDICES COMPARATIFS DES PRIX DE DÉTAIL PAR VILLE

Le tableau 10 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie des relevés de prix utilisés pour la production de l'indice mensuel des prix à la consommation.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont d'abord été calculées séparément pour les paires de villes suivantes:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison des 11 villes étant égale à 100).

Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en appliquant le schéma de pondération des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importants pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Notes pour le tableau 10

(2) Les poids indiqués sont les poids arrondis pour 1992 pour le Canada figurant dans le **Document de référence de l'Indice des prix à la consommation, mise à jour fondée sur les dépenses de 1992** (hors-série, no. 62-553 au catalogue). Ils ne sont présentés qu'à titre documentaire; les poids utilisés en fait sont les poids des villes combinés rajustés en fonction des variations des prix observées depuis 1992.

(3) Includes the following sub-groups: sugar and syrups, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegars, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

(3) Comprend les sous-groupes suivants: sucre et sirop, confiserie, margarine, autres huiles et matières grasses comestibles, café, thé, condiments, épices et vinaigres, soupe, aliments pour bébés et enfants, préparations alimentaires précuites et congelées, boissons non-alcoolisées et toutes autres préparations alimentaires.

Appendix 4

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 4

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 15 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la révision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 15 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Principal commodity group	Number of items priced (if available)
Food at home	170
Meals away from home	12
Household maintenance and services	7
Household supplies	28
Communications	3
Domestic help (depending on location)	2-8
Clothing and home furnishings	29
Transportation and automobile operation	22
Health and personal care	41
Reading and recreation	51
Tobacco and alcohol	20

Groupe principal de produits	Nombre d'articles dont le prix est relevé (lorsque disponibles)
Aliments consommés à la maison	170
Repas pris à l'extérieur	12
Entretien et services ménagers	7
Fournitures ménagères	28
Communication	3
Aide-domestique (dépendant de l'endroit)	2-8

Tabacs et boissons alcoolisées	20

Don't let the changing world
take you by surprise!

Ne soyez pas dépassé
par les événements!

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, **Canadian Social Trends**. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, **Canadian Social Trends** combines painstaking research with dynamic prose on topics like **ethnic diversity, low-income families, time-crunch stress, violent crime** and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust **Canadian Social Trends** to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

Canadian Social Trends (catalogue number 11-0080XPE) is \$34 (plus GST and applicable PST) annually in Canada, US\$41 in the United States and US\$48 in other countries.

Le vieillissement de la population. Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

Suivez l'évolution spectaculaire de la société canadienne grâce à **Tendances sociales canadiennes**, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans **Tendances sociales canadiennes**. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que **la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime** et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent **Tendances sociales canadiennes** pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à **Tendances sociales canadiennes** (n° 11-0080XPF au catalogue) coûte 34 \$ (plus la TPS et la TVP en vigueur) au Canada, 41 \$ US aux États-Unis et 48 \$ US dans les autres pays.

Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au centre de services-conseils de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication.

Vous pouvez aussi envoyer votre commande par télécopieur, au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et donner votre numéro de carte VISA ou MasterCard. Via l'Internet: order@statcan.ca

Don't let this happen to you!

Ne vous laissez pas dépasser par les événements!

Imagine you're called upon to make a really important business decision. You spend some anxious days weighing your options. You examine the available data. Finally, you make your decision...

...only to discover too late that your information was incomplete or outdated!

If you've ever experienced this type of frustration... or if your reputation ever depends on the quality of the data you refer to... **Infomat** is for you.

Infomat is your fastest and easiest way to keep on top of important Canadian economic and social trends. Since it comes to you weekly – not daily – issues won't pile up unread. And, in just one publication, you'll have the answers to almost anything:

- ✓ price indexes
- ✓ manufacturing shipments and orders
- ✓ imports and exports
- ✓ labour market conditions, and
- ✓ dozens of key social and economic indicators!

And because **Infomat** is based on over 100 ongoing Statistics Canada surveys, no other source is more timely or more reliable.

Infomat is specially designed and written for you – a busy manager with no time to waste!

Join the confident, successful decision-makers in the country and subscribe to Infomat today!

Infomat (catalogue no. 11-0020XPE) is only \$140* per year in Canada, US\$168 in the U.S. and US\$196 in other countries. Also available by Fax Service: 50 issues for \$600* in Canada, US\$600 in the U.S. and US\$600 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613) 951-1584 and use your VISA or MasterCard.

OR MAIL your order to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. Via Internet: order@statcan.ca *plus GST and applicable PST

Imaginez que vous devez prendre une décision de gestion très importante. Vous vous faites du mauvais sang pendant quelques jours à évaluer vos options. Vous examinez les données disponibles. Vous vous décidez enfin...

... pour vous rendre compte trop tard que vous vous êtes fondé sur de l'information incomplète ou périmée!

Si vous avez déjà vécu ce genre de situation... ou si vous devez un jour miser votre réputation sur la qualité des données que vous avancez...

Infomat est pour vous.

Infomat est la façon la plus rapide et la plus facile de se tenir au courant des tendances économiques et sociales importantes au Canada. Comme il s'agit d'un hebdomadaire – non d'un quotidien – vous aurez le temps de le lire. Et dans une seule et même publication, vous trouverez réponse à presque tout :

- ✓ indices de prix
- ✓ livraisons et commandes des fabricants
- ✓ importations et exportations
- ✓ situation du marché du travail, et des
- ✓ dizaines d'indicateurs socio-économiques clés!

Et comme **Infomat** est fondé sur plus de 100 enquêtes permanentes de Statistique Canada, aucune autre source n'est plus à jour ou plus fiable.

Infomat est conçu et rédigé pour des gens comme vous – des gestionnaires qui n'ont pas de temps à perdre!

Faites comme bien d'autres décideurs au pays qui ont réussi et abonnez-vous à Infomat aujourd'hui même!

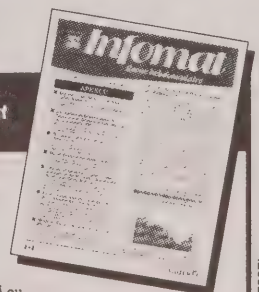

Infomat (n° 11-0020XPF au catalogue) ne coûte que 140 \$* par année au Canada, 168 \$ US aux États-Unis et 196 \$ US dans les autres pays. Nous vous offrons également le service de télécopie : 50 numéros pour 600 \$* au Canada, 600 \$ US aux États-Unis et 600 \$ US dans les autres pays.

Vous pouvez nous joindre PAR TÉLÉPHONE AU 1-800-267-6677

ou PAR TÉLÉCOPIEUR au (613) 951-1584 et utiliser votre carte VISA ou MasterCard. Ou envoyez votre commande PAR LA POSTE à :

Statistique Canada, Division des opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario), K1A 0T6. Vous pouvez aussi communiquer avec le Centre de consultation de Statistique Canada le plus près. La liste de ces centres se retrouve dans la présente publication.

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistics Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 (plus GST and applicable PST) annually in Canada, US\$260 in the United States and US\$310 in other countries.

Highlights of the *Canadian Composite Leading Indicator* (catalogue no. 11F0008XFE) are available by fax – the same day of release – for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Via Internet: order@statcan.ca

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique** annuel à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ (plus la TPS et la TVP en vigueur) au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'*Indicateur composite avancé* (n° 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division des Opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard. Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Information and Current Analysis Unit, Prices Division, Statistics Canada, Ottawa, Ontario, K1A 0T6 (telephone: (613) 951-9606), fax: (613) 951-2848), Internet: shadsan@statcan.ca or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020

Standards of service to the public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and services to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolinguée et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à : Sous-section de l'information et de l'analyse courante, Division des prix, Statistique Canada, Ottawa, Ontario, K1A 0T6 (téléphone : (613) 951-2848) télécopieur : (613) 951-2848), Internet : shadsan@statcan.ca ou à l'un des centres de consultation régionaux de Statistique Canada :

Note of appreciation

Canada owes the success of its statistical system to a long-standing co-operation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- amount too small to be expressed
- p preliminary figures
- r revised figures
- x confidential to meet secrecy requirements of the Statistics Act

NOTE ON CANSIM

Most of the data published in *The Consumer Price Index* (Catalogue 62-001) and *Consumer Prices and Price Indexes* (Catalogue 62-010) is also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System). In general, CANSIM provides a longer historical series. For further information on CANSIM call (613) 951-8200 or write to Electronic Data Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, K1A 0T6.

Additional Information and Related Publications

Detailed information on the methodology and concepts of the CPI is contained in *The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures*, (Occasional), Catalogue 62-553. Information regarding the Family Expenditure Surveys is contained in two volumes: *Family Food Expenditure in Canada, 1992*, Catalogue 62-554, and *Family Expenditure in Canada, 1992*, Catalogue 62-555.

Consumer Price Index series for Canada, the provinces, Whitehorse, Yellowknife and sixteen cities, in addition to other related price information are also available in *The Consumer Prices Indexes*, (Monthly), Catalogue 62-001. In addition, selected educational and promotional material is available. For these and further information, contact the Consumer Prices Section, Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6 (613-951-9606).

This publication was prepared under the direction of:

Louis Marc Ducharme, Director, Prices Division

Margaret Parlor, Chief, Consumer Prices Section

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- nombres infimes
- p nombres provisoires
- r nombres rectifiés
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret

NOTE CONCERNANT CANSIM

La plupart des données publiées dans *L'indice des prix à la consommation* (n° 62-001 au catalogue) et *Prix à la consommation et indices des prix* (n° 62-010 au catalogue) peuvent être obtenues, sous forme lisible par machine, de CANSIM (Système canadien d'information socio-économique). Les séries historiques sont généralement plus longues dans CANSIM. Pour plus d'information sur CANSIM, signaler (613) 951-8200 ou écrire à Division du marketing, Statistique Canada, Immeuble R.H. Coats, Ottawa, K1A 0T6.

Renseignements supplémentaires et publications connexes

Les méthodes et les concepts de l'IPC sont décrits en détail dans le *Document de référence de l'indice des prix à la consommation, Mise à jour fondée sur les dépenses de 1992*, (hors série), n° 62-553 au catalogue. Des renseignements au sujet des enquêtes sur les dépenses des familles se retrouvent dans deux volumes distincts: *Dépenses alimentaires des familles au Canada, 1992*, n° 62-554 au catalogue; et *Dépenses des familles au Canada, 1992*, n° 62-555 au catalogue.

Des séries d'indices des prix à la consommation pour le Canada, les provinces, Whitehorse, Yellowknife et seize villes, ainsi que d'autres renseignements sur les prix sont publiés dans *L'indice des prix à la consommation*, (mensuel), n° 62-001 au catalogue. De plus, certains documents éducatifs et publicitaires sont disponibles. Pour plus de renseignements, communiquer avec la Section des prix à la consommation, Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6 (613-951-9606).

Highlights

Consumer Price Behaviour

Fourth Quarter, 1996

Trends in Consumer Price Movements

Increased new vehicle prices and auto insurance premiums were the main factors behind a 0.7% increase in the Consumer Price Index (CPI) between September and December, 1996 (fourth quarter). The same movement was seen in the first quarter of 1996 while the movements in the second (0.5%) and third (0.2%) quarters were lower. In seasonally adjusted terms, the fourth quarter increase was 0.9%. The seasonally adjusted movements in the first three quarters of the year ranged from 0.4% to 0.5%.

Prices rose by 0.2% between September and October, advanced a further 0.4% in November, then showed no change in December. The seasonally adjusted monthly increases declined progressively from 0.4% in October to 0.3% in November to 0.2% in December.

Changes in the CPI from the same month of the previous year accelerated over the course of the fourth quarter reaching a 1996 high of 2.2% in December.

The annual average index for 1996 was 1.6% above the annual average index for 1995. This annual increase was lower than the 2.1% rate seen in the previous year.

Contributions by selected major components (not seasonally adjusted)

The principal reason for the 0.7% increase in the CPI between September and December was an increase in transportation charges, most notably for auto insurance, new vehicles, air travel and gasoline. Consumers also paid more for food, tobacco products and shelter, but paid less for recreation, clothing and footwear.

Ontario's Bill 59, which came into effect on November 1st, modified the level of accident benefits Ontario residents are required to purchase as part of their vehicle insurance. By choosing the new basic coverage, most drivers could maintain or lower their auto insurance payments. The CPI, however, compares the price of a fixed basket of goods and services over time. To compare the old and new packages, Statistics Canada calculated the price of the new basic coverage with options to make it equivalent to the old coverage. The value for the expanded right to sue for economic loss in Bill 59 was not included in the calculation, consistent with international practices for the CPI. Statistics Canada estimates that Ontario policy holders would have to pay, on average, 19.3% more than in October to maintain the equivalent level of coverage. This advance added close to 0.3% to the monthly and annual movement of the All-items CPI for Canada.

New vehicle prices rose 3.9% in November when the new model automobiles, light trucks and vans were introduced into the CPI. Comparisons are made between the features of the new and the previous year's models, and adjustments are made to the prices to compensate for any differences.

Air fares advanced by 14.1% in the fourth quarter with much of the increase concentrated in December. Part of the rise in December was associated with seasonal increases (holiday travel) and part with the higher price of aviation fuel.

Faits saillants

Comportement des prix à la consommation

Quatrième trimestre de 1996

Tendances des mouvements des prix à la consommation

L'augmentation du prix des véhicules neufs et des primes d'assurance de véhicules a été le principal facteur d'une progression de 0,7% de l'indice des prix à la consommation (IPC) entre septembre et décembre 1996 (quatrième trimestre). Le même mouvement a été observé au premier trimestre de 1996, tandis que les gains du deuxième (0,5%) et du troisième (0,2%) trimestre ont été plus faibles. En chiffres désaisonnalisés, l'augmentation du quatrième trimestre a été de 0,9%. Les mouvements désaisonnalisés des trois premiers trimestres de l'année ont été compris entre 0,4% et 0,5%.

Les prix ont monté de 0,2% entre septembre et octobre, ont progressé encore 0,4% en novembre, puis sont demeurés inchangés en décembre. Les hausses mensuelles désaisonnalisées ont été progressivement moins fortes, passant de 0,4% en octobre à 0,3% en novembre, puis à 0,2% en décembre.

Les variations de l'IPC par rapport au mois correspondant de l'année précédente se sont accélérées au cours du quatrième trimestre, atteignant en décembre un sommet de 2,2% pour 1996.

L'indice moyen annuel pour 1996 a été de 1,6% au-dessus de l'indice moyen annuel pour 1995. Cette augmentation annuelle a été inférieure au taux de 2,1% de l'année précédente.

Contributions de certaines composantes principales (non désaisonnalisées)

Le principal facteur de la progression de 0,7% de l'IPC entre septembre et décembre a été une augmentation des frais de transport, et plus particulièrement du prix de l'assurance-automobile, des véhicules neufs, des voyages aériens et de l'essence. Les consommateurs ont aussi payé plus cher les aliments, les produits du tabac et le logement, mais moins pour les loisirs, l'habillement et les chaussures.

La loi 59 de l'Ontario, qui est entrée en vigueur le 1^{er} novembre, a changé le niveau des garanties-accidents que les Ontariens sont tenus d'acheter dans le cadre de leur assurance de véhicule. En choisissant la nouvelle protection de base, la plupart des automobilistes ont pu maintenir ou abaisser leurs paiements d'assurance-automobile. L'IPC, par contre, compare les prix d'un panier fixe de biens et de services dans le temps. Afin de comparer le nouveau contrat d'assurance à l'ancien, Statistique Canada a calculé le prix du nouveau contrat en tenant compte de la nouvelle protection de base et des options permettant d'obtenir une protection équivalente à l'ancien contrat. La valeur relative à l'extension du droit de poursuivre en justice pour pertes financières dans la loi 59 n'a pas été prise en ligne de compte dans les calculs, en conformité avec les pratiques internationales pour l'IPC. Statistique Canada estime que les assurés ontariens devraient payer, en moyenne, 19,3% de plus qu'en octobre pour conserver un niveau équivalent de protection. Cette hausse a ajouté près de 0,3% au mouvement mensuel et annuel de l'IPC d'ensemble pour le Canada.

Le prix des véhicules neufs a monté de 3,9% en novembre avec l'ajout à l'IPC des nouveaux modèles d'automobiles, de camionnettes et de fourgonnettes. Après comparaison des caractéristiques des modèles de la nouvelle et de l'ancienne année, on apporte des corrections aux prix pour compenser les différences.

Les tarifs aériens ont augmenté de 14,1% au quatrième trimestre, une bonne part de l'augmentation étant concentrée en décembre. Une partie de la hausse de décembre était associée aux augmentations saisonnières (voyages pour la saison des Fêtes) et une autre partie à l'accroissement du prix du carburant aviation.

Gasoline prices rose in October and November but fell slightly in December, netting to an overall increase of 2.0% in the fourth quarter.

Much of the 4th quarter rise in the prices of food purchased from grocery stores resulted from higher prices for fresh vegetables, bakery products, dairy products, fresh fruit, breakfast cereal and beef. At the same time, December promotions for poultry, processed meat and soft drinks resulted in price declines for these products.

Almost all the advance in the tobacco products index occurred in December as five provinces (Quebec, Ontario, New Brunswick, Nova Scotia and Prince Edward Island) increased taxes by 70 cents per carton of 200 cigarettes. These tax increases were accompanied by a rise of the same amount in the Federal tax.

Shelters charges rose by 0.3% in the fourth quarter as increases in fuel oil prices (10.5%) and piped gas rates (8.4%) were noted. The annual property tax increase of 1.2% posted in October also contributed to the increase. A considerable proportion of the rise in shelter charges was offset by the continuing decline in mortgage interest costs.

The decline in recreational charges resulted from a seasonal reduction in traveller accommodation rates. The rate reductions in the last four months of the year offset the large increases noted in the spring and summer.

Clothing and footwear prices fell 1.7% during the quarter. Generally, even larger price declines are noted between September and December in this component.

Special aggregates

The Goods index rose by 1.2% in the fourth quarter, preceded by a decline of 0.4% in the third quarter. Most of the latest rise came from advances of 1.6% in the prices of non-durables (food, gasoline, cigarettes, piped gas and fuel oil) and 1.5% in the prices of durables (new vehicles). A small offset resulted from a decline of 0.9% in the prices of semi-durables (mostly clothing and footwear).

The Services index rose by a more moderate 0.2% in the fourth quarter following a much sharper 0.8% advance in the third quarter. In the latest quarter, increases in auto insurance premiums and air fares were offset, to a large extent, by declines in mortgage interest costs and traveller accommodation rates.

The Energy index advanced by 2.5% in the latest period compared to a drop of 1.7% in the third quarter. In the fourth quarter, substantial price increases were observed for gasoline (2.0%), fuel oil (10.5%) and piped gas (8.4%). In contrast, the price of electricity rose by a mere 0.1%.

The All-items excluding Food and Energy index climbed by 0.4% in the fourth quarter following a sharper 0.7% rise in the third quarter.

Provincial CPIs

Increases in provincial CPIs in the fourth quarter ranged from 1.2% in Nova Scotia and Manitoba to 0.1% in Prince Edward Island and British Columbia. Larger than average increases were also observed in New Brunswick (1.1%) and Ontario (1.1%). Much smaller than average advances were also noted in Alberta (0.2%), Quebec (0.4%) and Newfoundland (0.4%).

Le prix de l'essence a monté en octobre et novembre, mais reculé légèrement en décembre, pour une augmentation globale nette de 2,0% au quatrième trimestre.

Une bonne part de la progression du 4^e trimestre du prix des aliments achetés à l'épicerie est la conséquence d'une augmentation de prix des légumes frais, des produits de boulangerie, des produits laitiers, des fruits frais, des céréales de table et du boeuf. En même temps, les promotions de décembre pour la volaille, les viandes traitées et les boissons gazeuses ont amené des baisses de prix de ces produits.

La hausse de l'indice des produits du tabac a eu lieu presque toute en décembre, mois où cinq provinces (le Québec, l'Ontario, le Nouveau-Brunswick, la Nouvelle-Écosse et l'Île-du-Prince-Édouard) ont relevé leurs taxes de 70 cents par carton de 200 cigarettes. Ces augmentations de taxe ont été accompagnées d'une majoration correspondante de la taxe fédérale.

Les frais de logement ont monté de 0,3% au quatrième trimestre, où l'on a observé des augmentations du prix du mazout (10,5%) et des tarifs du gaz (8,4%). L'augmentation annuelle de 1,2% des impôts fonciers en octobre a aussi contribué à la hausse. Une proportion considérable de la progression des frais de logement a été effacée par le recul continu des coûts d'intérêt hypothécaire.

La baisse des frais de loisirs a été la conséquence d'une réduction saisonnière des tarifs d'hébergement pour les voyageurs. Les réductions de tarifs des quatre derniers mois de l'année ont épongé les augmentations marquées du printemps et de l'été.

Le prix de l'habillement et des chaussures a chuté de 1,7% au cours du trimestre. En général, on observe des replis encore plus importants entre septembre et décembre pour cette composante.

Agrégats spéciaux

L'indice des biens a monté de 1,2% au quatrième trimestre, après un repli de 0,4% au troisième. Le gros de la dernière augmentation s'explique par des hausses de 1,6% du prix des biens non durables (aliments, essence, cigarettes, gaz et mazout) et de 1,5% du prix des biens durables (véhicules neufs). Une baisse de 0,9% des prix des biens semi-durables (surtout l'habillement et les chaussures) a eu un léger effet de compensation.

L'indice des services a connu une augmentation plus modérée de 0,2% au quatrième trimestre, après une progression beaucoup plus nette de 0,8% au troisième. Au dernier trimestre, les augmentations des primes d'assurance-automobile et des tarifs aériens ont été neutralisées, dans une large mesure, par des diminutions des coûts d'intérêt hypothécaire et des tarifs d'hébergement pour voyageurs.

L'indice de l'énergie a progressé de 2,5% dans la dernière période, à comparer à un repli de 1,7% au troisième trimestre. Au quatrième trimestre, on a observé d'importantes hausses de prix pour l'essence (2,0%), le mazout (10,5%) et le gaz (8,4%). Par contraste, le prix de l'électricité n'a avancé que de 0,1%.

L'indice d'ensemble sans les aliments et l'énergie a gagné 0,4% au quatrième trimestre, après un gain beaucoup plus net de 0,7% au troisième.

IPC des provinces

Les augmentations des IPC des provinces au quatrième trimestre se sont situées entre 1,2% en Nouvelle-Écosse et au Manitoba et 0,1% à l'Île-du-Prince-Édouard et en Colombie-Britannique. On a aussi observé des augmentations supérieures à la moyenne au Nouveau-Brunswick (1,1%) et en Ontario (1,1%). Il faut signaler également des augmentations nettement inférieures à la moyenne en Alberta (0,2%), au Québec (0,4%) et à Terre-Neuve (0,4%).

THE CONSUMER PRICE INDEX TECHNICAL NOTES

Definition

The Consumer Price Index (CPI) is an indicator of the changes in consumer prices experienced by the target population. The CPI measures price change by comparing, through time, the cost of a fixed basket of commodities. This basket is based on the expenditures of the target population in a certain reference period, currently 1992. Since the basket contains commodities of unchanging or equivalent quantity and quality, the index reflects only pure price movements.

Separate CPI's are published for Canada, the ten provinces, Whitehorse and Yellowknife. Some CPI information is also available for an additional sixteen cities. Since the CPI is a measure of price change from one time period to another, it cannot be used to indicate differences in price levels between provinces or cities.

Population Coverage

The population targeted by the Consumer Price Index consists of families and individuals living in urban and rural private households. For practical reasons, residents of the Territories outside Whitehorse and Yellowknife are not represented by the index. Previous to January 1995, the target population consisted of private households in Canadian urban centres with a population of 30,000 or more.

Time Reference

The CPI compares, in percentage terms, prices in any given time period to prices in the official base period which, at present, is 1986=100. The official time base was changed from 1981=100 to 1986=100 starting with the CPI for June 1990. The change is strictly an arithmetic conversion which alters the index levels but leaves the percentage changes between any two periods intact, except for differences in rounding.

Percent Versus Index Point Changes

The movements of the indexes from one month to another are expressed as percent changes rather than changes in index points. Index point changes are affected by the level of the index which, in turn, depends on the time base of the particular index. The percentage change between any two time periods can be readily calculated by dividing the index point difference between the two time periods by the index for the earlier period and multiplying the result by one hundred.

Price Coverage

The prices used in the CPI calculation are final prices, inclusive of excise and other indirect taxes paid by consumers. In particular, they include the Goods and Services Tax as well as provincial retail sales taxes wherever applicable. It follows that the CPI can change as a result of modifications to any of these taxes.

The selection of commodities and the outlets from which prices are collected is judgmental, other than for rents. The number of prices required for a given commodity depends on the

Appendice 1

L'INDICE DES PRIX À LA CONSOMMATION NOTES TECHNIQUES

Définition

L'indice des prix à la consommation (IPC) est un indicateur des variations des prix à la consommation payés par la population cible. L'IPC mesure la variation des prix en comparant, dans le temps, le coût d'un panier fixe de biens et de services. Ce panier est basé sur les dépenses de la population cible au cours d'une période de référence qui est actuellement 1992. Comme ce panier comprend des biens et des services dont la quantité et la qualité ne changent pas ou sont équivalentes, l'indice ne retrace que les mouvements de prix purs.

On publie des IPC distincts pour le Canada, les provinces, Whitehorse et Yellowknife. Certains renseignements sont aussi publiés pour seize autres villes. Comme l'IPC est une mesure de la variation de prix entre deux périodes, il ne peut servir à relever les différences de niveau des prix entre les provinces ou les villes.

Champ d'observation de la population

La population couverte par l'indice des prix à la consommation comprend les familles et les personnes vivant dans des ménages privés urbains et ruraux. Pour des raisons pratiques, les résidents des Territoires à l'extérieur de Whitehorse et de Yellowknife ne sont pas représentés. Avant janvier 1995, la population cible comprenait les ménages privés vivant dans les centres urbains du Canada dont la population était de 30,000 habitants ou plus.

Période de base

L'IPC compare, en pourcentage, les prix au cours d'une période donnée à ceux de la période de base officielle, qui est actuellement 1986 = 100. On a changé la période de base de 1981 = 100 à 1986 = 100 à compter de l'IPC du mois de juin 1990. Ce changement est uniquement une conversion arithmétique qui modifie le niveau des indices, mais laisse les variations en pourcentage entre deux périodes intactes, à l'exception des différences dues à l'arrondissement.

Changements en pourcentage versus changements en points d'indice

Les fluctuations des indices d'un mois à l'autre sont exprimées en pourcentage, plutôt qu'en point d'indice. Les variations en point d'indice sont en fonction du niveau de l'indice qui, à son tour, dépend de la période de base de l'indice en question. Par contre, il est facile de calculer la variation en pourcentage entre deux périodes en divisant la différence en point d'indice entre ces deux périodes par l'indice de la période antérieure, et en multipliant ensuite ce résultat par cent.

Champ d'observation des prix

Les prix qui entrent dans le calcul de l'IPC sont les prix finals, ce qui comprend les taxes d'accise et les autres impôts indirects que les consommateurs paient. En particulier, les prix comprennent la taxe sur les produits et les services, ainsi que les taxes de vente au détail provinciales, au besoin. L'IPC peut donc varier à cause des modifications apportées à ces taxes.

La sélection des biens et des services, ainsi que des points de vente où l'on recueille les prix, se fait au jugé, à l'exception des loyers. Le nombre de prix nécessaires pour un bien ou service donné dépend de

importance and the nature of the commodity. The samples are designed to represent volume selling commodities and outlets. The principal objective of the sample design is to ensure an informative, reliable and impartial picture of consumer inflation at the national and provincial levels.

Price collection for a given month's index is carried out during the first three weeks of the month. Although prices for most CPI commodities are collected monthly, prices for commodities having less frequent price changes (e.g. property taxes and electricity rates) are collected at intervals longer than one month. Special pricings are carried out where there is evidence that significant price changes have occurred between scheduled pricing periods.

Weights and Linking

The CPI maintains fixed quantitative proportions (weights) between commodities during the life of a given basket. The baskets are updated periodically to take into account changes in consumer expenditure patterns. In January 1995, the basket reflecting the 1992 expenditure patterns replaced the 1986 basket. The continuity of the CPI series is maintained by "linking" the corresponding indexes obtained from consecutive baskets.

The CPI is calculated as a weighted average of specified commodity price indexes. The weights are derived from Family Expenditure Survey data. Text Table 1 compares the expenditure shares of the two most recent CPI baskets, i.e. those of 1992 and 1986. Because both sets of weights are expressed in December 1994 or "link month" prices, the differences reflect the shifts in the relative quantities purchased between the two baskets. The differences are a result of changes in consumer expenditure patterns over time and of the expansion of the population coverage.

When reconstructing or re-aggregating published CPI series, the changes in weights and the linking procedures must be taken into account. For a description of the methodology required to reconstruct or re-aggregate CPI series, see the Consumer Price Index Reference Paper cat. 62-553 (Occasional) or contact Prices Division.

¹ The 1986 data were adjusted to be comparable with the classification system used for the 1992 basket.

¹ Les données de 1986 ont été modifiées de façon à correspondre au système de classification utilisé pour le panier de 1992.

l'importance et de la nature de celui-ci. L'échantillon est conçu de façon à représenter les produits et services ainsi que les établissements à fort volume de ventes. Le principal objectif du plan de sondage est d'obtenir une image précise, fiable et impartiale de l'inflation représentée par les prix à la consommation aux niveaux national et provincial.

La collecte des prix pour l'indice d'un mois donné se fait pendant les trois premières semaines du mois. Bien que les prix de la plupart des biens et services entrant dans l'IPC soient recueillis chaque mois, les prix des biens ou des services ayant des variations de prix moins fréquentes (impôts fonciers, tarifs de l'électricité, par exemple) sont recueillis à des intervalles dépassant un mois. Des relevés spéciaux de prix sont faits lorsqu'il est évident que des variations de prix appréciables se sont produites entre les périodes régulières de relevé de prix.

Pondération et enchaînement

L'IPC maintient des proportions quantitatives fixes (pondérations) entre les biens et les services pendant la durée de vie d'un panier. Le panier est habituellement mis à jour régulièrement afin de prendre en compte les changements dans la composition des dépenses des consommateurs. En janvier 1995, le panier qui retrace la composition des dépenses de 1992 a remplacé le panier de 1986. La continuité des séries de l'IPC est assurée par un « enchaînement » des indices correspondants provenant de paniers consécutifs.

On calcule l'IPC comme une moyenne pondérée d'indices de prix de biens ou de services précis. Les pondérations sont tirées des données de l'Enquête sur les dépenses des familles. Le tableau explicatif 1 compare les parts des dépenses des deux paniers les plus récents, ceux de 1992 et de 1986. Comme les deux ensembles de pondérations sont exprimés en prix de décembre 1994, qui est le « mois d'enchaînement », les différences reflètent les mouvements des quantités relatives achetées entre les deux paniers. Les différences s'expliquent par les variations de la composition des dépenses des consommateurs dans le temps et par l'extension du champ d'observation de la population.

Quand on reconstruit ou ré-agrège les séries publiées de l'IPC, il faut prendre en compte les changements de pondérations et les procédures d'enchaînement. Pour une description de la méthodologie à utiliser dans la reconstruction des séries de l'IPC ré-agrégées, consulter le document de référence sur l'indice des prix à la consommation portant le numéro de catalogue 62-553 (Hors série), ou s'adresser à la Division des prix.

prix à la consommation, par composante
principale, pour le Canada

Whitehorse and Yellowknife Indexes

The relatively small size of the housing market in these two cities makes it difficult to construct reliable price indexes for new houses. To compensate, the price movements of rental accommodation are used to approximate the price movements of new houses. The rent information itself is collected using different pricing frequencies and collection methods than in the rest of the country. Because of these problems, the indexes for Rented Accommodation, Owned Accommodation and Shelter are not published for these two cities. Further, the All-items indexes published for these two cities are not strictly comparable with the same indexes for the provinces or the other sixteen urban centres.

Calculation of City Indexes

With the introduction of the 1992 basket, emphasis was shifted from city data to provincial data. City All-items series were continued since many users had come to rely on this service, but the method of calculation was changed. Shelter indexes are calculated for each city. This recognizes the importance of Shelter in the basket, the significant and persistent differences in price movements between cities, and the availability of local data. For the other seven major components, the movement of the provincial counterpart (or, in the cases of Montréal, Toronto, and Vancouver, a sub-provincial counterpart) is used. The major components are aggregated using the city's expenditure pattern to arrive at each city's All-items index.

Seasonal Adjustment

Seasonal adjustment is performed within each basket at the level of the eight major components. The seasonally adjusted All-items series is a weighted average of the eight seasonally adjusted major components. It was linked in December 1994 with the seasonally adjusted series calculated before then to form a continuous series starting in September 1978. Each month's data is fixed until the end of the year when the series is revised. Because the revision can lead to changes in both the levels and movements of the indexes, users employing the CPI for indexation purposes are advised to use the unadjusted indexes.

The Purchasing Power of the Consumer Dollar

As prices rise, a dollar will buy fewer goods and services. Because the CPI measures changes in the general price level, it is often used to estimate changes in the purchasing power of the Canadian dollar. For example, between 1986 and 1994, the All-items Canada CPI rose from 100.0 to 130.7, indicating that consumers had to pay 30.7% more to buy the same quantity of goods and services. Looked at in terms of purchasing power, a dollar in 1994 would purchase the same amount as 76.5¢ $\{(100.0 / 130.7) * 100\}$ did in 1986. This process may be interpreted as the deflation of money or the adjustment of money values to eliminate price effects.

Indices de Whitehorse et de Yellowknife

La taille relativement faible du marché de l'habitation de ces deux villes rend difficile la construction d'indices de prix fiables pour les maisons neuves. Pour corriger cette situation, on se sert du mouvement des prix du logement en location pour obtenir une approximation de celui des maisons neuves. Les renseignements sur les loyers proprement dits sont obtenus à des fréquences de relevé des prix et selon des méthodes de collecte qui diffèrent de celles utilisées ailleurs dans le pays. En raison de ces problèmes, les indices du logement en location, du logement en propriété et du logement ne sont pas publiés pour ces deux villes. Enfin, les indices d'ensemble publiés pour ces deux villes ne sont pas strictement comparables aux mêmes indices pour les provinces ou les seize autres centres urbains.

Calcul des indices des villes

Avec la venue du panier de 1992, l'accent est passé des données des villes aux données des provinces. Les séries des indices d'ensemble pour les villes ont été conservées parce que de nombreux utilisateurs se sont habitués à ce service, mais la méthode de calcul a changé. Les indices du logement sont calculés pour chaque ville. Ainsi, on prend en compte l'importance du logement dans le panier, les différences appréciables et persistantes dans les mouvements des prix entre villes et la disponibilité de données locales. Pour les sept autres composantes principales, on utilise le mouvement de l'indice provincial (pour Montréal, Toronto et Vancouver, un indice infra-provincial). Les composantes principales sont agrégées à partir de la composition des dépenses de la ville pour donner, en fin de compte, l'indice d'ensemble de cette dernière.

Désaisonnalisation

On effectue la désaisonnalisation pour chaque panier au niveau des huit composantes principales. La série désaisonnalisée de l'indice d'ensemble est une moyenne pondérée des huit composantes principales désaisonnalisées. Elle a été enchaînée en décembre 1994 à la série désaisonnalisée calculée auparavant pour donner une série continue qui commence en septembre 1978. Les données de chaque mois sont inchangées jusqu'à la fin de l'année, lorsque la série fait l'objet d'une révision. Comme cette dernière peut entraîner des changements dans les niveaux et dans les mouvements des indices, il est recommandé aux utilisateurs qui se servent de l'IPC à des fins d'indexation de prendre les indices bruts.

Le pouvoir d'achat du dollar à la consommation

Lorsque les prix montent, le dollar achète moins de biens et de services. Parce qu'il mesure les variations du niveau général des prix, l'IPC sert souvent à estimer les variations du pouvoir d'achat du dollar canadien. Ainsi, entre 1986 et 1994, l'IPC d'ensemble pour le Canada est passé de 100,0 à 130,7 : les consommateurs ont donc dû déboursier 30,7% de plus pour acheter la même quantité de biens et de services. Pour ce qui est du pouvoir d'achat, le dollar de 1994 achèterait la même quantité de biens et de services que 76,5 cents $\{(100,0 / 130,7) * 100 \text{ cents}\}$ en 1986. Ce processus peut s'interpréter comme la déflation de l'argent ou l'ajustement des valeurs monétaires, pour la correction des effets de prix.

Appendix 2

Average retail prices

Average retail prices for food, household supplies, personal care items and cigarettes

Table 5 shows, for each month of the quarter, average prices for selected food, household supply and personal care items and for cigarettes.

Prices for these items are collected as part of the regular monthly CPI survey. Prices for the selected food, household supply and personal care items are observed in food supermarkets, while prices for cigarettes are collected in supermarkets, department stores, drug stores and tobacco shops. Average prices for each commodity are calculated as a weighted average of the average prices in the observed cities using the population of these cities as weights.

The commodities which are priced can vary in quality between outlets or between cities. This is the reason why average prices are not published for each of those cities. Brands and outlets can also vary from month to month. Therefore, average prices may not necessarily be fully comparable from one month to another and should not be used as an appropriate measure of pure price change through time. A matched commodity and outlet sample is used for the CPI to determine the pure price movement of commodities through time.

Appendice 2

Prix de détail moyens

Prix de détail moyens pour les aliments, les produits d'entretien ménager, les produits de soins personnels et les cigarettes

Le tableau 5 présente, pour chaque mois du trimestre, des prix moyens pour certains produits alimentaires, ménagers et de soins personnels ainsi que pour les cigarettes.

Les données sur les prix utilisées dans le calcul sont celles qui ont été recueillies dans le cadre de l'enquête mensuelle régulière de l'IPC. Les prix des aliments et des produits d'entretien ménager et de soins personnels ont été relevés dans des supermarchés alimentaires, alors que les prix des cigarettes ont été observés dans des supermarchés, dans des magasins à rayons, dans des pharmacies et dans des débits de tabac. Les prix moyens pour chaque produit sont obtenus en effectuant une moyenne pondérée des prix moyens de chaque ville observée en utilisant la population de ces villes comme pondération.

Les produits dont on relève les prix peuvent varier en qualité d'un point et de vente ou d'une ville à l'autre. C'est la raison pour laquelle les prix moyens ne sont pas publiés pour chacune des villes. Les marques sélectionnées ainsi que les points de vente peuvent aussi varier d'un mois à l'autre. Les prix moyens ne sont donc pas nécessairement entièrement comparables d'un mois à l'autre et ne devraient pas être considérés comme une mesure appropriée des mouvements de prix purs à travers le temps. L'IPC utilise un échantillon apparié de produits et de points de vente pour calculer le mouvement de prix pur des produits dans le temps.

Appendix 3

INTER-CITY INDEXES OF RETAIL PRICE DIFFERENTIALS

Table 10 shows consumer price differentials prevailing amongst 11 Canadian cities situated in all 10 provinces for a selection of commodities and services at the specified point in time.

The data base of this place-to-place study of comparative retail prices was largely drawn from the large volume of price quotations collected for the production of the monthly consumer price indexes.

In developing these spatial price relationships, efforts were made to achieve comparability by seeking to equate qualities of goods and services in the various locations and by matching types of retail outlets as far as possible. To optimize price comparability between locations, differential price measurements were initially derived separately as between the following pairs of cities:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

Within each city pair, price quotations were matched at the item level on the basis of identical specifications, including brand names whenever possible and also with some regard for comparability of retail outlets and merchandising practices. By means of a linking procedure, the paired city item indexes were initially compared with their counterparts in a common base city; subsequently they were related to the weighted average of the combined 11 cities equalling 100.

The city-to-city price relationships for individual items thus derived were then aggregated by application of the combined 11-city weighting patterns updated for price change to the time of the inter-city retail price comparison study.

It should be noted, especially in periods of volatile price movement, that city-to-city retail price relationships may be significantly affected by the timing and the relative rate of price change occurring in each location. Furthermore, since the retail prices used in this study are those faced by consumers, they include sales and excise taxes as applicable. Thus, comparative rates of provincial sales tax in effect in the various cities at the time of price comparison, as well as changes in the rate of incidence of such taxes, can be of importance in explaining inter-city price differentials for tax-affected items or groups of items.

Footnotes for Table 10

(2) The weights shown are rounded 1992 weights for Canada as contained in the report **The Consumer Price Index Reference Paper, Updating Based on 1992 Expenditures (Occasional)**, Catalogue 62-553. They are provided for illustration only; the weights actually used are combined city weights with adjustments for price change since 1992.

Appendice 3

INDICES COMPARATIFS DES PRIX DE DÉTAIL PAR VILLE

Le tableau 10 présente les différences de prix à la consommation de 11 villes du Canada, situées dans les 10 provinces, pour un nombre choisi de biens et de services, pour la période de temps spécifiée.

Les données de cette étude comparative de prix de détail proviennent en grande partie des relevés de prix utilisés pour la production de l'indice mensuel des prix à la consommation.

Des efforts ont été entrepris pour développer des comparaisons valables en cherchant à obtenir des qualités identiques de biens et de services dans les différents endroits et en couplant, lorsque possible, des points de vente au détail comparables, pour déterminer les relations de prix spatiales. Afin d'optimiser la comparaison des prix entre les différents endroits, les mesures différentielles de prix ont d'abord été calculées séparément pour les paires de villes suivantes:

St. John's	-	Halifax
Charlottetown	-	Halifax
Saint John	-	Halifax
Ottawa	-	Halifax
Toronto	-	Montréal
Ottawa	-	Toronto
Toronto	-	Winnipeg
Regina	-	Winnipeg
Edmonton	-	Winnipeg
Edmonton	-	Vancouver

À l'intérieur de chaque paire de villes, les prix ont été couplés au niveau de l'article en s'assurant que les spécifications étaient identiques, y compris les marques, lorsque c'était possible et aussi en tenant compte de la comparaison des points de vente au détail et des méthodes de vente. Grâce à la procédure de couplage, les indices couplés des villes ont d'abord été comparés au niveau de l'article et transformés sur la base d'une ville commune, ils ont ensuite été reliés à une moyenne pondérée (la combinaison des 11 villes étant égale à 100).

Les relations entre les prix d'articles entre les villes ainsi déduites ont été regroupées en appliquant le schéma de pondération des 11 villes combinées, mis à jour par la variation de prix qui s'est effectuée jusqu'au moment de l'étude comparative des prix de détail entre les villes.

Il convient de noter, surtout dans une période de fluctuation des prix, que les relations entre les prix de détail d'une ville à l'autre peuvent varier de façon significative selon la période de relevé des prix et le taux relatif de variation des prix à chaque endroit. De plus, puisque les prix de détail utilisés pour cette étude sont ceux que les consommateurs doivent payer, les taxes de vente et d'accise y sont incluses. Donc, les taux comparatifs des taxes de vente provinciale effectives dans les diverses villes au temps de la comparaison, de même que le changement dans le taux ou l'incidence de ces taxes, peuvent être importants pour expliquer les différences de prix entre les villes, des articles ou groupes d'articles taxables.

Notes pour le tableau 10

(2) Les poids indiqués sont les poids arrondis pour 1992 pour le Canada figurant dans le **Document de référence de l'Indice des prix à la consommation, mise à jour fondée sur les dépenses de 1992** (hors-série, no. 62-553 au catalogue). Ils ne sont présentés qu'à titre documentaire; les poids utilisés en fait sont les poids des villes combinés rajustés en fonction des variations des prix observées depuis 1992.

(3) Includes the following sub-groups: sugar and syrups, confectionery items, margarine, other edible fat and oil items, coffee, tea, condiments, spices and vinegars, soup, infant and junior foods, pre-cooked frozen food preparations, non-alcoholic beverages and all other food preparations.

(3) Comprend les sous-groupes suivants: sucre et sirop, confiserie, margarine, autres huiles et matières grasses comestibles, café, thé, condiments, épices et vinaigres, soupe, aliments pour bébés et enfants, préparations alimentaires précuites et congelées, boissons non-alcoolisées et toutes autres préparations alimentaires.

Appendix 4

INTERNATIONAL RETAIL PRICE COMPARISONS

Those concerned with a need for some comparative measure of the retail prices that a Canadian-based employee may encounter while serving outside Canada, will be interested to know that the Government Allowance Indexes Section, Statistics Canada, produces indexes relating retail prices in foreign countries to those prevailing in Ottawa. The "post indexes" as they are called have been developed primarily to regulate the allowance levels of expatriate Canadian Government civilian and military personnel and because of this, they are very specialized in purpose, and specific to the use for which they were designed. Nonetheless, organizations faced with compensating employees for foreign retail price conditions might well find them to be a useful building-block on which to develop and administer a viable foreign service allowance system.

A post index is, at any given point in time, the expression of the current spatial (or place-to-place) retail price relationship of a range of goods and services at a foreign location, with those prices prevailing in Ottawa, rounded to the nearest five points. Ottawa price levels are always expressed as 100. Thus, a post index of 110 for example, means that prices at the foreign location are estimated to be 10% above those in Ottawa, and specifically, that they have been calculated to fall within the index range 107.5 to 112.4, i.e., 7.5% to 12.4% above Ottawa. For reasons discussed later, the highest degree of accuracy claimed for post indexes, is inherent in their being rounded as described.

The post index encompasses price comparisons for such family expenditure categories as food consumed in the home, meals taken in restaurants, household maintenance, household supplies, communications, domestic help, clothing, transportation, health and personal care, reading and recreation, the prices of some 230 items being considered, as indicated in the table hereunder. Several important elements of expenditure are excluded. Since Canadian public servants pay Canadian income taxes regardless of their place of duty, income tax differentials are not considered. Shelter and fuel and utilities expenditures are excluded from the comparison because the federal government compensates for excess costs of these items by means of benefits separate from those regulated by statistical means. Finally, government employees serving abroad may be entitled to purchase liquor, cigarettes, gasoline, etc., at tax-free prices or they may have access to special purchasing facilities not available to the public at large. To the extent that these conditions prevail, they are reflected in post index calculations.

Accordingly, post indexes should not be automatically applied to general uses without regard to their possible limitations. Potential users of these indexes are advised to discuss the specifics of their needs with the Government Allowance Indexes Section, and they may also wish to familiarize themselves with the total foreign service benefit package provided by the Federal Government, details of which may be obtained from the Personnel Policy Branch, Treasury Board, Government of Canada.

Appendice 4

COMPARAISONS INTERNATIONALES DES PRIX DE DÉTAIL

Les personnes qui sont conscientes du besoin d'une mesure comparative des prix de détail auxquels peut faire face un employé canadien en poste à l'étranger seront intéressées d'apprendre que la Section des indices des indemnités de l'état de Statistique Canada produit des indices qui établissent le rapport entre les prix de détail dans les pays étrangers et ceux d'Ottawa. Les "indices de poste" ont été créés à l'origine afin de fixer le niveau des indemnités aux fonctionnaires et aux militaires canadiens postés à l'étranger; en conséquence, ils ont un but très spécialisé et ne s'appliquent qu'à l'utilisation pour laquelle ils ont été créés. Toutefois, les organismes qui doivent verser des indemnités à des employés en vertu des prix de détail à l'étranger pourraient trouver les indices comme une base utile pour élaborer et administrer un système viable d'indemnités pour service à l'étranger.

Un indice de poste est, à une période donnée, l'expression de la relation spatiale actuelle (ou d'un endroit à un autre) entre le prix de détail d'une variété de biens et services à un endroit à l'étranger et les prix à Ottawa, arrondis au plus proche multiple de cinq. Le niveau des prix à Ottawa est toujours 100. Ainsi, un indice de poste de 110 signifie que l'on évalue les prix à un endroit situé à l'étranger à 10% au-dessus de ceux d'Ottawa et plus précisément que l'on a calculé qu'ils tombaient dans la classe d'indice 107.5 à 112.4; c'est donc dire qu'ils sont de 7.5% à 12.4% supérieurs à ceux d'Ottawa. Pour les raisons ci-après, le plus haut degré de précision dont on puisse se prévaloir pour les indices de poste est fonction de ce qu'ils ont été arrondis comme il est dit ci-dessus.

L'indice de poste renferme des comparaisons de prix pour les catégories de dépenses des familles comme les aliments consommés à la maison, les repas pris au restaurant, l'entretien du ménage, les fournitures ménagères, les communications, le personnel domestique, les vêtements, le transport, les soins personnels et de santé, la lecture et les loisirs; on compare les prix de 230 articles environ, tels que présentés ci-dessous. Plusieurs éléments importants de dépenses sont exclus. Les fonctionnaires canadiens paient leur impôt sur le revenu au Canada, quel que soit le lieu de leur travail; les différences concernant l'impôt sur le revenu ne sont donc pas prises en considération. Les dépenses de logement, de chauffage et de services ne font pas partie de la comparaison parce que l'administration publique fédérale compense les dépenses excessives à cet égard à l'aide de prestations déterminées par des moyens autres que statistiques. Enfin, les fonctionnaires en poste à l'étranger ont parfois le droit d'acheter en franchise des boissons alcooliques, des cigarettes, de l'essence, etc., ou ils ont accès à des magasins spéciaux fermés au grand public. Ces conditions réapparaissent plus ou moins fortement lors du calcul des indices de poste.

Les indices de poste ne doivent donc pas être généralisés automatiquement sans tenir compte de leurs limites éventuelles. Nous conseillons à tous ceux qui utiliseraient cet indice de discuter leurs besoins spécifiques avec la section des indices des indemnités de l'état; ceux-ci peuvent également désirer se familiariser avec l'ensemble complet des bénéfices accordés par le gouvernement fédéral pour le service à l'étranger; ils pourront obtenir cette information en s'adressant à la Direction de la politique du personnel, Conseil du Trésor, gouvernement du Canada.

The primary sources of data used in post index construction are periodic retail price and living cost surveys conducted at foreign locations by the foreign service personnel stationed there. The survey data is analyzed by Statistics Canada. In addition to a variety of price information gathered from retail outlets patronized by Canadian personnel at the post, data are also obtained regarding their spending patterns, along with information on the availability of any special local purchasing facilities, and the extent to which staffs make direct importation of consumer goods from other countries.

The general aim is for full-scale surveys to be carried out at about three-year intervals. However, specific studies may be undertaken more or less frequently than this, depending on the volatility of retail price conditions in each particular country, the instability of exchange rates and the extent to which close monitoring of changes in the local retail price situation being faced by Canadian personnel can be achieved through reference to other statistical indicators.

Once established, every post index is subjected to a monthly review, the object being to assess its continuing validity in the light of exchange rate movements, as well as on the basis of price and other economic intelligence obtained from various sources. Statistics Canada is in monthly receipt of an extensive range of price data from foreign governments, international agencies, and world-wide commercial enterprises. The purpose of the data collection is to assess and apply the most accurate possible measurement of price movements at each foreign post since the time of the last survey. In parallel, Ottawa price movements for the same period are also taken into account. Furthermore, since post indexes relate to personnel whose emoluments are expressed in Canadian dollars, shifts in the Canada foreign country currency exchange rate are an integral part, and in some cases the major element, in the review. If the comparative retail price relationship expressed by an existing post index should appear to have changed by five index points, a new post index level may be brought into effect without necessarily undertaking another complete survey.

In developing any place-to-place statistics of retail price differentials, very difficult problems arise from geographic variations in consumers' buying habits and differences in the quality and availability of goods and services. These problems are magnified in international comparisons. By and large, however, conventions and techniques have been developed which attempt to overcome these problems in the context of the specific uses that these indexes are meant to serve. As measures designed to meet a particular administrative need, post indexes achieve their goal if they fairly reflect, in a general way, the price differentials between locations being encountered by those to whom they are applicable.

Table 15 shows a selection of the approximately 250 post indexes currently being maintained, the effective date of their validity for government allowance purposes, and the exchange rates upon which they are predicated.

Readers should bear in mind that these indexes are shown as examples only, and that any one of them may have changed by the time it could be published.

Les principales sources de données qui servent à la création de l'indice de poste sont des enquêtes périodiques sur les prix de détail et le coût de la vie menées dans les divers postes par le personnel du service extérieur. Les résultats de ces enquêtes sont analysés et compilés par Statistics Canada. Non seulement on recueille divers renseignements sur les prix auprès des points de vente au détail où le personnel canadien en poste à l'étranger s'approvisionne, mais encore on se procure des données sur les habitudes de dépenses, des renseignements relatifs à l'existence de points d'achat spéciaux sur place et au volume des importations directes de biens à la consommation effectuées par le personnel dans d'autres pays.

On se propose généralement de mener une enquête exhaustive une fois tous les trois ans environ. Toutefois des études spécifiques peuvent être menées à intervalles plus ou moins rapprochés en fonction, du degré d'instabilité des conditions des prix de détail dans chaque pays et des taux de change compte tenu de ce qu'une surveillance étroite des changements de la situation locale des prix de détail peut être exercée au moyen d'autres indicateurs statistiques.

Une fois établi, chaque indice de poste est révisé tous les mois afin de s'assurer qu'il est encore valable compte tenu des variations des cours de change, des prix et d'autres renseignements d'ordre économique obtenus de diverses sources. Statistique Canada reçoit chaque mois une grande variété de données sur les prix provenant des gouvernements étrangers, des organismes internationaux et des entreprises commerciales du monde entier. La collecte de ces données doit permettre de calculer avec le plus de précision possible l'évolution des prix à chaque poste étranger depuis la dernière enquête. Parallèlement, on tient compte de l'évolution des prix à Ottawa pour la même période. De plus, comme les indices de poste concernent un personnel dont le traitement est exprimé en dollars canadiens, les variations du cours du change canadien dans le pays étranger en question font partie intégrante de la révision et en sont, dans certains cas, l'élément le plus important. Lorsqu'il apparaît que la relation comparative des prix de détail, exprimée par l'indice actuel du poste a changé de cinq points d'indice, un nouvel indice de poste peut être adopté sans que l'on décide nécessairement de mener une nouvelle enquête complète.

Lors de l'élaboration de statistiques comparatives des prix de détail en divers endroits, des problèmes très difficiles surgissent en raison des variations géographiques dans les habitudes d'achat à la consommation et dans les différences de qualité et de disponibilité des biens et services. Les problèmes se compliquent encore lorsqu'il s'agit de comparaisons internationales. Dans une très large mesure cependant, des conventions et des techniques ont été mises au point en vue de résoudre ces problèmes dans le contexte même de l'usage spécifique auquel ces indices sont destinés. En tant que mesures destinées à satisfaire un besoin administratif particulier, les indices de poste joueront leur rôle s'ils rendent généralement bien compte des différences de prix entre différents endroits auxquelles font face des personnes à qui ces indices s'appliquent.

Le tableau 15 présente une sélection des quelques 250 indices de poste, leur date d'entrée en vigueur dans le cadre du programme des indemnités de l'état, et les taux de change sur lesquels ils ont été établis.

Le lecteur devra noter que ces indices ne sont fournis qu'à titre d'exemple seulement, et que chacun d'entre eux a pu changer au temps où on a pu le publier.

Further information regarding post indexes is available on request from the Government Allowance Indexes Section, Prices Division, Statistics Canada, telephone: (613) 951-9598.

On peut obtenir d'autres renseignements au sujet des indices de poste en s'adressant à la section des indices des indemnités de l'état, division des prix, Statistique Canada, téléphone: (613) 951-9598.

Principal commodity group	Number of items priced (if available)
Food at home	170
Meals away from home	12
Household maintenance and services	7

Hire our team of researchers for \$56 a year

Notre équipe de chercheurs est à votre service pour 56 \$ par année

Subscribing to *Perspectives on Labour and Income* is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But *Perspectives* is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analyzing the statistics to bring you simple, clear summaries of labour market and income trends.

Our team of experts brings you the latest labour and income data. Each quarterly issue provides:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research
- information on new surveys

As a special bonus, twice a year you will also receive *The Labour Market Review*, giving you timely analysis on labour market performance over the previous six months or year.

And all for only \$56!

Thousands of Canadian professionals turn to *Perspectives* to discover emerging trends in labour and income and to stay up to date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find *Perspectives* indispensable. GUARANTEED. If you aren't convinced after reading the first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to *Perspectives* today (Cat. No. 75-0010XPE).

ORDER NOW!

For only \$56 (plus \$3.92 GST and applicable PST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$68 for U.S. customers and US\$80 for customers in other countries. Fax your VISA or MasterCard order to: (613) 951-1584. Call toll free: 1-800-267-6677. Or mail to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication. Via Internet: order@statcan.ca

S'abonner à *L'emploi et le revenu en perspective*, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les

tendances actuelles du marché du travail et des revenus.

Notre équipe de spécialistes met à votre disposition des données récentes sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez :

- des articles de fond sur l'emploi et le revenu
- plus de 50 indicateurs clés de l'emploi et du revenu
- un aperçu de la recherche en cours
- de l'information sur les nouvelles enquêtes

En prime, vous recevrez le *Bilan du marché du travail* deux fois l'an. Vous disposerez ainsi d'une analyse à jour de la situation du marché du travail pour les six derniers mois ou la dernière année.

Tout cela pour 56 \$ seulement!

Des milliers de professionnels au Canada consultent *Perspective* pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que *L'emploi et le revenu en perspective* deviendra pour vous un outil indispensable. C'EST GARANTI. Si vous n'êtes pas satisfait après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à *Perspective* (n° 75-0010XPF au cat.) dès aujourd'hui.

ABONNEZ-VOUS DÈS MAINTENANT!

Pour 56 \$ seulement (plus 3,92 \$ de TPS et la TVP en vigueur en sus), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 68 \$ US aux États-Unis et de 80 \$ US dans les autres pays. Faites parvenir votre commande par télécopieur (VISA ou MasterCard) au (613) 951-1584, par téléphone (sans frais) au 1-800-267-6677, par courrier à Statistique Canada, Division des Opérations et de l'intégration, Direction de la circulation, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6. Ou communiquez avec le Centre de consultation de Statistique Canada le plus près. (Voir la liste dans la présente publication). Via l'Internet: order@statcan.ca

THANK YOU FOR YOUR ORDER!

Canada

Don't let this happen to you!

Ne vous laissez pas dépasser par les événements!

Imagine you're called upon to make a really important business decision. You spend some anxious days weighing your options. You examine the available data. Finally, you make your decision...

...only to discover too late that your information was incomplete or outdated!

If you've ever experienced this type of frustration... or if your reputation ever depends on the quality of the data you refer to... **Infomat** is for you.

Infomat is your fastest and easiest way to keep on top of important Canadian economic and social trends. Since it comes to you weekly – not daily – issues won't pile up unread. And, in just one publication, you'll have the answers to almost anything:

- ✓ price indexes
- ✓ manufacturing shipments and orders
- ✓ imports and exports
- ✓ labour market conditions, and
- ✓ dozens of key social and economic indicators!

And because **Infomat** is based on over 100 ongoing Statistics Canada surveys, no other source is more timely or more reliable.

Infomat is specially designed and written for you – a busy manager with no time to waste!

Imaginez que vous devez prendre une décision de gestion très importante. Vous vous faites du mauvais sang pendant quelques jours à évaluer vos options. Vous examinez les données disponibles. Vous vous décidez enfin...

... pour vous rendre compte trop tard que vous vous êtes fondé sur de l'information incomplète ou périmée!

Si vous avez déjà vécu ce genre de situation... ou si vous devez un jour miser votre réputation sur la qualité des données que vous avancez...

Infomat est pour vous.

Infomat est la façon la plus rapide et la plus facile de se tenir au courant des tendances économiques et sociales importantes au Canada. Comme il s'agit d'un hebdomadaire – non d'un quotidien – vous aurez le temps de le lire. Et dans une seule et même publication, vous trouverez réponse à presque tout :

- ✓ indices de prix
- ✓ livraisons et commandes des fabricants
- ✓ importations et exportations
- ✓ situation du marché du travail, et des
- ✓ dizaines d'indicateurs socio-économiques clés!

Et comme **Infomat** est fondé sur plus de 100 enquêtes permanentes de Statistique Canada, aucune autre source n'est plus à jour ou plus fiable.

Infomat est conçu et rédigé pour des gens comme vous – des gestionnaires qui n'ont pas de temps à perdre!

Join the confident, successful decision-makers in the country and subscribe to Infomat today!

Infomat (catalogue no. 11-0020XPE) is only \$140* per year in Canada, US\$168 in the U.S. and US\$196 in other countries. Also available by Fax Service: 50 issues for \$600* in Canada, US\$600 in the U.S. and US\$600 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613) 951-1584 and use your VISA or MasterCard.

OR MAIL your order to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

1 To safeguard your place in tomorrow's marketplace, you have to be able to anticipate trends today. To do that, you're going to need some insight into the purchasing trends in the Canadian marketplace.

With a complete profile of Canadian consumers, plus an indepth analysis of Canadian industries, the **Market Research Handbook** gives you the most thorough coverage of purchasing trends. This valued bestseller can lead you to new markets by giving you details on:

- ▶ how much money Canadians are earning and what they're spending on cars, rent, home entertainment and household appliances;
 - ▶ the level of sales in retail chain and department stores;
 - ▶ what goods are being traded between Canada, U.S., and other countries;
 - ▶ census data such as: age/sex, schooling, households, unemployment, interprovincial and international migration
- ...and much, much more!

With over 600 pages, the **Handbook** includes more than 200 statistical tables that give you instant access to provincial and national market data. Featured are important economic indicators such as the **Gross Domestic Product, Labour Force Productivity, Private and Public Investment** and the **Consumer Price Index**.

Order your copy of the **Market Research Handbook** (Catalogue #63-2240XPB) today for only \$110 in Canada plus \$7.70 GST and applicable PST, US\$132 in the United States, and US\$154 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR FAX (613)951-1584 and use your VISA or MasterCard. **OR MAIL** your order to: Statistics Canada, Operations and Integration Division, Circulation Management, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Office listed in this publication. Via Internet: order@statcan.ca

2 Pour maintenir votre place sur le marché de demain, vous devez être en mesure de prévoir les tendances aujourd'hui. Pour ce faire, vous devrez comprendre les habitudes d'achat sur le marché canadien.

Renfermant un profil complet des consommateurs canadiens ainsi qu'une analyse approfondie des industries canadiennes, le **Recueil statistique des études de marché** brosse un tableau exhaustif des habitudes d'achat. Ce précieux best-seller peut vous faire découvrir de nouveaux marchés en vous fournissant les détails suivants :

- ▶ les revenus des Canadiens et leurs dépenses pour la voiture, le loyer, les appareils de divertissement et les appareils ménagers;
 - ▶ le niveau des ventes dans les magasins de détail à succursales et les grands magasins;
 - ▶ les biens échangés entre le Canada, les É.-U. et d'autres pays;
 - ▶ les données du recensement telles que l'âge, le sexe, le niveau de scolarité, les ménages, le chômage, la migration interprovinciale et internationale
- ...et bien plus encore!

Le **Recueil**, contenant plus de 600 pages et au delà de 200 tableaux statistiques, vous permettra d'accéder instantanément aux données provinciales et nationales sur le marché. Il traite d'indicateurs économiques importants tels que le **produit intérieur brut**, la **productivité de la population active**, les **investissements privés et publics** et l'**Indice des prix à la consommation**.

Procurez-vous votre exemplaire du **Recueil statistique des études de marché** (n° 63-2240XPB au catalogue) dès aujourd'hui pour seulement 110 \$ au Canada plus 7,70 \$ de TPS et la TVP en vigueur, 132 \$ US aux États-Unis et 154 \$ US dans les autres pays. Commandez votre exemplaire **PAR TÉLÉPHONE EN COMPOSANT SANS FRAIS** le 1-800-267-6677 **OU PAR TÉLÉCOPIEUR** au (613) 951-1584 et utilisez votre carte VISA ou MasterCard, **OU PAR LA POSTE** à l'adresse suivante : Statistique Canada, Division des Opérations et de l'intégration, Direction de la circulation, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le bureau régional de Statistique Canada le plus près dont la liste figure dans la présente publication. Via l'Internet: order@statcan.ca
